Information:

Extralink Beauty Intelligent Water Flosser L8 is a smart, portable water flosser, ideal for everyday oral hygiene at home and on the go. Its strong yet gentle water stream effectively reaches between teeth and below the gum line, removing plaque and debris where a regular toothbrush and floss may not be enough. It is perfect for use with braces, crowns, bridges and veneers. It helps remove up to 99.9% of plaque and supports gum health by up to 50%, leaving you feeling fresh after every use.

Full product description

Take your oral hygiene to the next level

Here is the Extralink Beauty Intelligent Water Flosser L8 - a smart, portable water irrigator - the perfect travel partner for a perfect professional teeth cleaning always at hand!

Experience precision in action

With a powerful, yet gentle stream of water, the irrigator easily reaches even the hardest-to-reach areas of the mouth, eliminating stubborn plaque and debris that standard brushing can struggle with. It is perfect for cleaning braces, crowns, bridges and veneers. Using this excellent cleaner, you can enjoy the feeling of refreshed and revitalized teeth and gums after every use.

Made for a life on the move

With its stylish and handy design, the portable water irrigator fits perfectly into a busy lifestyle. Whether you're in the office, traveling on business, or exploring the beauty of nature while camping, this travel irrigator will always accompany you on the go, taking care of your oral health under any conditions.

A range of benefits

The Extralink irrigator effectively eliminates plaque and debris deep between the teeth and below the gum line, areas that ordinary brushing and standard flossing can't reach. It removes up to 99.9% of plaque from areas where it is used, and provides up to 50% better results in improving gum health.
