Full product description

Extralink BN60: Three-phase car charger for your electric vehicle

Meet the Extralink BN60 - a powerful solution for electric vehicle charging needs. This portable three-phase charger provides an impressive maximum output of 11 kW, which guarantees fast and efficient charging. This will reduce the time you need to charge your battery, making the most of every moment.

Compatibility and versatility

The BN60 supports 380V systems and is equipped with a CEE16A3P connector, making it compatible with a wide range of electric vehicles. Whether you need to charge your car while on the road or in your home garage, the BN60 will meet your needs. Ideal for anyone who needs a reliable and versatile charger.

Safety and performance

Designed with safety in mind, the BN60 uses a five-wire system for maximum protection during use. This charger is the choice for users who want high performance in a portable form factor. The guarantee of stable and safe power transfer makes the BN60 a leader in its class.

Ideal for mobile users

The BN60 is ideal for people who are constantly on the go and don't want to give up charging power. The portable design allows you to easily take the charger anywhere, providing easy access to fast charging whenever you need it.

An investment that pays off

Invest in the Extralink BN60 and join the ranks of users who value speed, efficiency and mobility in charging their electric vehicles. Reliability and performance in one device - that's what the BN60 from Extralink offers.
