Information:

The Extralink portable electric car charger is a compact and convenient charging solution for use at home, on the road and while camping. It offers 16A 3,6 kW power, a 5-metre Type 2 cable and a Schuko plug, making it compatible with most EV models. The colour LCD display shows charging progress and time to full charge, while the intelligent circuit automatically fixes common errors. A high level of safety is ensured by the RCD Type A + 6mA protection, overheat protection and temperature monitoring. The IP67 ingress protection rating guarantees resistance to dust and water, as well as reliable operation in harsh conditions.

Product features

Charging cable length	5 m
Touchscreen	No
Operating temperature (T-T)	-40 - 55 °C
Output current	16 A
AC input voltage	100 V
Charging voltage	250 V
Power plug	Type F (Schuko)
Output power	3.6 kW
Product colour	Black
Built-in display	Yes

Full product description

Portable electric car charger from Extralink

Introducing our **Extralink portable EV charger**, the perfect solution for EV drivers who are always on the go. This charger is **compact and easy to carry**, making it the perfect accessory for road trips, camping adventures and any other outdoor activity. The portable EV charger is designed to work with most EV models and has a **built-in display** that shows charging progress, so you can constantly monitor it. The **IP67 rating** guarantees weather resistance.

Key features of the Extralink portable charger

LCD display

Equipped with a sleek LCD display, our EV charger provides real-time information on the status of charging, including time remaining to full charge.

Residual current protection RCD Type A 6mA

The product is equipped with RCD type A 6mA residual current protection, which meets the latest EU safety standards.

Temperature monitoring

Monitor the operating temperature of the charger at all times. When the charger exceeds the safe temperature, it will stop working immediately, and the charging system can be automatically resumed when the temperature returns to normal.

Chip automatically fixes errors

The smart chip can automatically fix common charging errors to ensure stable operation.

Full certification

The product has passed all relevant certifications in Europe and North America, ensuring that the product can be sold and used with complete confidence.

Degree of protection IP67

The EV portable charger has an **IP67 rating**, which means it is completely dustproof and can withstand immersion in up to 1 meter of water for up to 30 minutes. This rating ensures that the charger is protected from the elements and can operate even in the harshest conditions. You can focus on your journey without worrying about the safety and reliability of your charger.
