Information:

The steel balcony bracket for a satellite dish is a practical solution for residents of apartment blocks and multi-storey houses. It allows convenient mounting of the dish on the balustrade without drilling, thanks to clamp fastening. Made of galvanized steel, it offers high resistance to corrosion and damage, while the design with a length of 400 mm and a diameter of 38 x 1,5 mm ensures stability. Easy installation and the ability to quickly change its position make the bracket functional and convenient for everyday use.

Product features

Maximum load weight	10 kg
Coating	Galvanized coating
Material	Stainless steel
Number of holes	4
Hole diameter	8 mm

Type	Bracket
Designation	General purpose

Full product description

Bracket for mounting a satellite dish on the balcony

Steel balcony bracket is a good choice for people living in bunker houses or blocks of flats, because it allows to mount the antenna on the railing very conveniently. The use of galvanized steel ensures **resistance to corrosion** and other damage.

How to mount the holder on the balcony?

The holder with a total length of 400 mm and a diameter of 38 x 1.5 mm is fastened by means of a cyberbolt, so **there is no need to drill**. Installation of the antenna bracket is easy and quick, as well as possible change of its position.
