Price: **98.61 zł** gross / 80.17 zł net

Manufacturer: EXTRALINK

Referention number: DNXFMPKQERMMNQ

Information:

The Extralink cat. 5e STP 1U patch panel is a practical element of structured cabling for installation in a 19" rack cabinet. It enables cable termination and organisation in the distribution cabinet, ensuring convenient management of connections. Equipped with RJ-45 ports of category 5e STP, it helps maintain the appropriate transmission standard and secure shielding. A Krone knife-type crimping tool is used to connect the cables, while the connection to active devices is made using suitable patch cords. The compact 1U design saves space in the cabinet.

Product features

Connector(s)	RJ-45
Width	482.6 mm
Cable shielding	S/UTP (STP)
Rack capacity	1U
Cable tie(s) included	Yes
Cable types supported	Cat5e
Product colour	Black

Full product description

Patch panel by Extralink cat. 5e, STP, 1U

Patch panel (patch panel) is one of the basic elements used in the construction of structured cabling. It is mounted in the rails of a 19" rack with the same screws that are used to mount active devices. Patch panel is used to terminate cables that come together in the distribution cabinet.

To maintain the proper connection standard, the RJ-45 cat 5e STP ports of the patch panel are connected to the active device using patchcords of the appropriate category and design. The cable is connected to the patch panel with a dedicated crimping tool, also known as a Krone knife.
