Price: **80.00 zł** gross / 65.04 zł net

Manufacturer: EXTRALINK

Referention number: DNXFMPKPJRMNHN

Information:

The Extralink cat. 5e UTP 1U patch panel is a basic element of structured cabling used for terminating cables in a distribution cabinet. Designed for installation in a standard 19" rack cabinet, it makes it easier to organise and manage network connections. Equipped with RJ-45 ports of category 5e UTP, it ensures compatibility with suitable patchcords and a stable connection to active devices. Installation is carried out using a Krone knife-type punch-down tool, which allows for quick and convenient connection of the cables. This is a practical solution for a tidy and reliable network infrastructure.

Product features

Ports quantity	24
Output voltage	2 V
Connector contacts plating	Copper
Cabling technology	10/100/1000Base-T(X)
Rack capacity	1U
Mounting	Rack mounting
Cable types supported	Cat5e
Product colour	Black

Full product description

Patchpanel Extralink 24 ports cat. 5e UTP 1U

The patchpanel is one of the basic elements used for structural cabling. It is installed in 19" racks. The screws used for assembly are the same as for active devices. The task of the patchpanel is to terminate the cables coming down to the distribution cabinet.

The RJ45 cat 5e UTP patchpanel ports connect to the active device using patchcords of the appropriate category and design to maintain the appropriate connection standard. The cable is connected to the patchpanel with a krone tool.
