Product features

Connector(s)	RJ-45
Cable shielding	U/FTP (STP)
Rack capacity	1U
Cable tie(s) included	Yes
Cable types supported	Cat6
Product colour	Black

Full product description

Patchpanel 24-port

The **24-port shielded patchpanel** is used to route cables of various SCS subsystems and connect individual network components to each other using patch cables. Subscriber cables are connected using the LSA-type IDC straight-through contact method. Standard **RJ-45 jacks** are mounted on the front of the panel, in groups of 8 ports. The panel is mounted using a standard tool designed for LSA Block type connectors.
