Full product description

Stainless steel satellite dish holder

The robust stainless steel handle with satin finish allows for easy attachment to the chimney of an antenna mast with a maximum diameter of 50 mm. Thanks to the use of stainless steel the bracket is **resistant to adverse weather conditions**. The chimney clamp is ideal for places where you want to **avoid drilling**, for example in the chimney.

How to mount a satellite dish mount on the chimney

To facilitate the installation of the antenna, the kit includes 2 5m long inox tapes, 4 screws for tensioning the inox tapes and 6 protective corners.
