Full product description

UTP Cat.6 network cable. Package contains 50m of cable

Network cable most commonly used for the construction of local area networks. **Category 6** includes cabling whose bandwidth requirements are up to 250 MHz (bandwidth of 200 Mbps). It provides for the implementation of **Gigabit Ethernet (4x 250MHz = 1GHz) and ATM transmission of 622 Mbps**. It is built with 4 pairs of cables twisted together to eliminate electromagnetic and mutual interference. The cables are made of **pure copper** and surrounded by an **HDPE sheath with a diameter of 0.92 ± 0.03 mm**, which has an increased density and particularly **high dielectric insulation**. They have an outer **PVC sheath with a thickness of 0.50 ± 0.05 mm**.

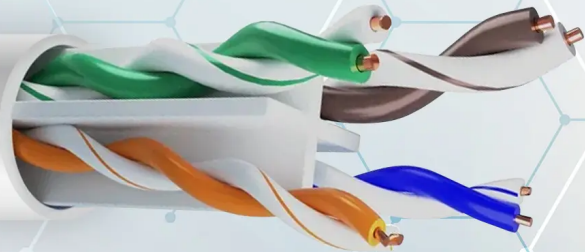

EXTRA LINK

Cat 6 UTP
1 Gbps / 250 MHz
Internal twisted pair
network cable 50m

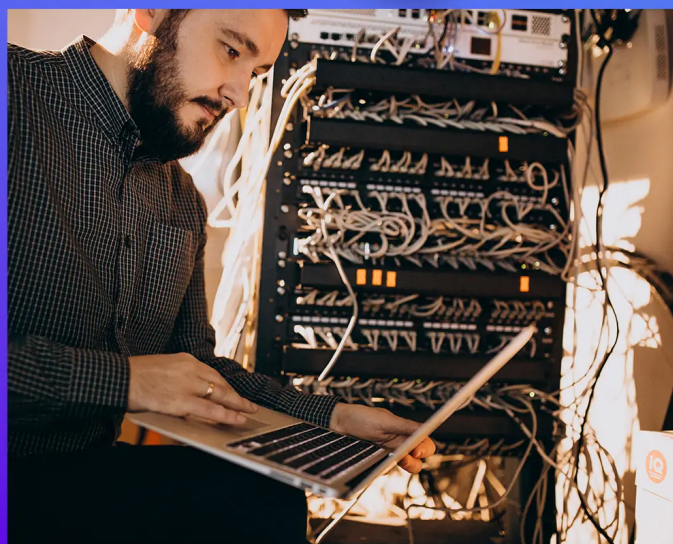

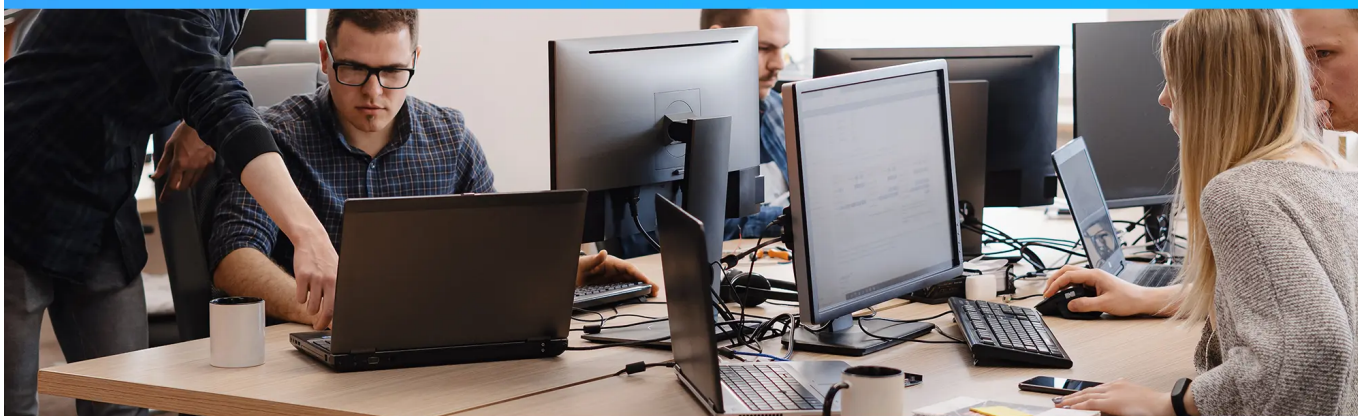

EXTRA LINK

Category 6 comprises cabling which requires a bandwidth of up to 250 MHz and a bandwidth of 200 Mbps, which anticipates the implementation of Gigabit Ethernet ($4 \times 250 \text{ MHz} = 1 \text{ GHz}$) and ATM transmission of 622 MB/s.

Features

WIDE RANGE OF APPLICATIONS

Durable cable for indoor installations

The cable is designed for indoor use. It is ideal for building installations in offices or homes. Twisted-pair cable is also often used in closed-circuit television installations, where one cable can transmit video signals from several cameras and power.

COMPREHENSIVE COMPATIBILITY
