Price: **139.99 zł** gross / 113.81 zł net

Manufacturer: EXTRALINK

Referention number: DNXFMPISJRMNIN

Information:

The Extralink cat. 6 UTP 0.5U patch panel with 24 RJ-45 ports is a practical element of structured cabling for installation in a 19" rack cabinet. It enables cable termination in the distribution cabinet and convenient connection to active devices using patch cords of the appropriate category. Thanks to its 0.5U height, it allows two such panels to be mounted in 1U, providing as many as 48 ports in a single mounting unit. Installation is carried out using a Krone knife-type punch-down tool.

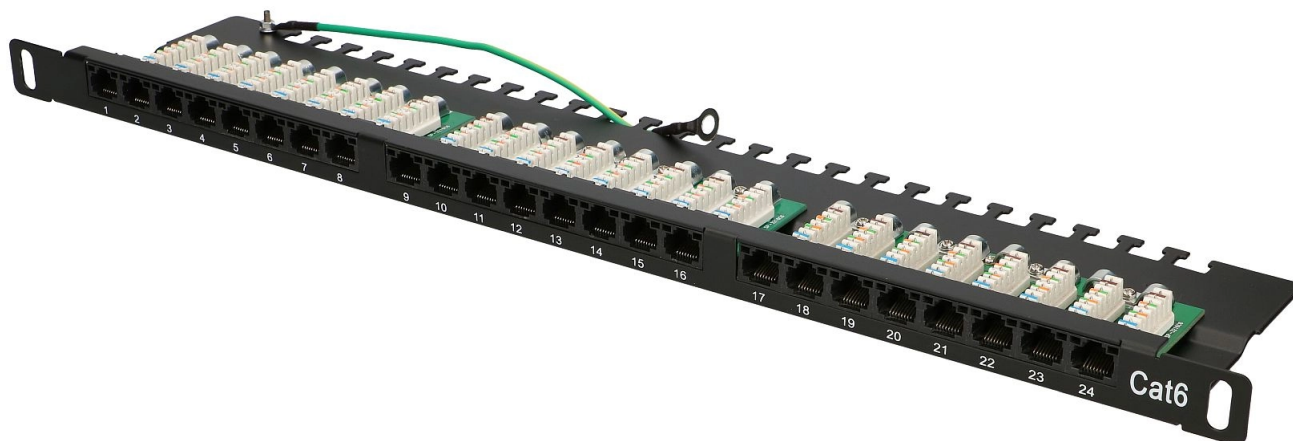

Product features

Ports quantity	24
Connector(s)	RJ-45
Width	482.6 mm
Cable shielding	U/UTP (UTP)
Rack capacity	0.5U
Cable types supported	Cat6
Product colour	Black

Full product description

Patchpanel Extralink 24 ports cat. 6 UTP 0.5U

Patchpanels are one of the basic elements used for structural cabling. It is installed in 19" racks. The screws used for assembly are the same as for active devices. The task of the patchpanel is to terminate the cables coming down to the distribution cabinet.

The RJ45 cat 6 UTP patchpanel ports connect to the active device using patchcords of appropriate category and design to maintain the appropriate connection standard. The unique feature is the height of the patchpanel in the rack - it is only 0.5U, i.e. two such patchpanels can be mounted in one mounting unit and thus have 48 ports in 1U. The cable is connected to the patchpanel using a punch down tool.
