Price: **87.33 zł** gross / 71.00 zł net

Manufacturer: EXTRALINK

Referention number: DNXFMPKPLRMNJL

Information:

The Extralink cat. 6 UTP 1U patch panel with 24 ports is a practical component for building structured cabling and organising connections in a 19" rack cabinet. It enables cable termination in the distribution cabinet and convenient network management. The RJ-45 category 6 ports ensure compliance with the UTP standard, and the 1U mounting helps save space. A Krone knife-type punch-down tool is used to connect the wires, while the connection to active devices is made using suitable patch cords.

Product features

Ports quantity	24
Width	482.6 mm
Cable shielding	U/UTP (UTP)
Rack capacity	1U
Cable types supported	Cat6
Product colour	Black

Full product description

Patchpanel Extralink 24 ports cat. 6 UTP 1U

The patchpanel is one of the basic elements used for structural cabling. It is installed in 19" racks. The screws used for assembly are the same as for active devices. The task of the patchpanel is to terminate the cables coming down to the distribution cabinet.

The RJ45 cat 6 UTP patchpanel ports connect to the active device using patchcords of appropriate category to maintain the appropriate connection standard. The cable is connected to the patchpanel using a punch down tool.
