Full product description

Stainless steel satellite dish holder

The robust stainless steel handle, with satin finish, allows for easy attachment to the chimney of an antenna mast with a maximum diameter of 50 mm. Thanks to the use of stainless steel the bracket is **resistant to adverse weather conditions**. The chimney clamp is ideal wherever you want to **avoid drilling**, for example in the chimney.

Installation of the satellite dish holder on the chimney

To make the installation of the antenna easier, the kit contains all necessary elements: 2 7 m long inox tapes, 4 inox belt tensioning screws and 6 protective corners.
