Full product description

Sector antenna D-2400-16-120

The **D-2400-16-120 sector antenna** is designed for operation in the wide frequency range of **2.4 GHz**. The antenna maintains a high gain of **16 dBi** over the entire operating frequency band. It is ideal for base stations in areas where many antennas operate in horizontal polarization. The housing is made of very durable material and fully protects the antenna from weather conditions. Excellent mounting system
