### Information:

The Black Forest SUP board 275 × 76 × 15 cm is an agile model for recreational paddling on lakes, rivers and calm waters. The shorter length makes manoeuvring and learning easier, while the 76 cm width provides a more stable stance. The 2700 GSM drop-stitch construction with reinforced sides and 3 mm EVA foam improves rigidity, grip and user comfort. The removable large fin helps maintain direction, and once deflated the board can be folded into a backpack, making transport and storage easier. The set includes a paddle, pump, leash, backpack, repair kit and instructions.

### Full product description

### Stability and Durability of Construction

The SUP-2000 board is designed for stability and comfortable swimming. Its dimensions - 275 cm in length, 76 cm in width and 15 cm in thickness - combined with a buoyancy of 260 liters and a maximum load of up to 130 kg, provide a solid platform for both lighter and heavier users. Construction based on durable materials, such as PVC, nylon and non-slip EVA foam on the top layer, guarantees resistance to water conditions and confident movement on the board. The board is designed to be inflated to a maximum of 15 psi for optimal stiffness.

### **Ideal for Beginners and Intermediates**

The SUP-2000 model is an excellent choice for those starting out on a SUP board, as well as for those who already have some experience. Its stable dimensions make it easy to maintain balance, and its lightweight construction (the board weighs just 10 kg, and 11 kg with complete equipment) makes it easy to transport and maneuver on the water. Available in a fresh green and turquoise color scheme, the board is not only functional, but also aesthetically pleasing.

## Complete Ready-to-Use Kit

When you buy the SUP-2000 board, you get everything you need to get on the water right away. It comes with the necessary equipment: a fin for better maneuverability, a paddle for propulsion, a practical backpack for easy transportation, a powerful pump for quick board preparation, a repair kit for minor damage, and a safety line (leash) connecting you to the board. The kit does not include the ability to mount a kayak seat, focusing on the experience of kayaking standing up.
