Price: **898.99 zł** gross / 730.89 zł net

Manufacturer: EXTRALINK

Referention number: DNXXGHPQGRMMMK

Information:

The Black Forest SUP board 335x81x15 cm is a stable and comfortable inflatable board for recreational paddling on lakes, rivers and calm waters. The 81 cm width and 15 cm thickness provide secure footing, good buoyancy and comfort for beginners, families and people learning balance. The 335 cm length makes for easy, steady handling and gives more space on the deck. Once deflated, the board can be folded and conveniently transported in a backpack. The set includes a foot leash, a removable large slot-type tail fin and a repair kit.

Full product description

Versatility and Expedition Readiness

The SUP-2013 board is the perfect companion for water expeditions, designed for a variety of bodies of water. Whether you're planning a leisurely cruise on a lake, river rafting, or exploring secluded sea bays, this board will work perfectly. What's more, you get a complete kit, including everything you need to immediately start your paddleboarding adventure. Its sturdy and well-thought-out construction guarantees that it will serve you reliably for many seasons to come.

Stability and Comfort for Every Skill Level

The design of the SUP-2013 board has been thought out for both first-time boarders and those with some experience. Its impressive width of 81 cm is the key to exceptional stability on the water. It will make even beginners feel confident, quickly catching their balance, which translates into increased comfort and enjoyment of swimming, allowing you to focus on admiring your surroundings rather than struggling to stay afloat.

Durable Construction for Many Seasons

Durability and resistance to damage are the features that distinguish the SUP-2013 board. It is made of selected durable materials, such as solid nylon, shock-absorbing EVA foam on the deck and reinforced PVC. This combination ensures not only optimal stiffness and lightness, but above all, excellent resistance to abrasion, minor impacts or weathering, which is a guarantee of the board's long life even with regular use.
