Price: **898.99 zł** gross / 730.89 zł net

Manufacturer: EXTRALINK

Referention number: DNXGGMPRMRNLH

Information:

The Black Forest SUP board 380 × 79 × 15 cm is a stable model for recreational paddling on lakes, rivers and calmer waters. Its longer shape and 79 cm width make it easier to keep your balance, while the 2700 GSM drop-stitch construction and 15 cm thickness provide rigidity and good control on the water. The double-layer sides increase durability, and the 3 mm EVA foam improves comfort and foot grip. The set includes an adjustable 3-piece aluminium paddle, a hand pump, a backpack, a safety leash, a removable fin, a repair kit and instructions, making the board ready for convenient use and easy transport.

Full product description

Stability and Security for Beginners

The **inflatable swimming board** is an ideal choice for beginner water sports enthusiasts. Equipped with a **single ballast**, the board is much more stable than models without this facility. This means that it is easier to maintain balance, which is extremely important when learning and exploring this form of water tourism. The stability of the board makes it **more predictable to ride**, which significantly increases the comfort and safety of use.

Strength and Durability

The board is designed for long-term use. Made of a **reinforced material with a density of 2500 gsm**, it is resistant to punctures, UV radiation and harsh water conditions. The composite shell with a **thick layer of fiberglass-reinforced PVC** and a 5mm layer of EVA foam provides excellent grip and stability. Heat bonding of the outer and inner layers guarantees the effect of smooth and compact bonding of all elements, which increases the strength and life of the board.

Ease of Use

Thanks to the **high-pressure valve**, the SUP board can be inflated very quickly with the **included pump** to the recommended 15 PSI (1 bar). When you're done with a day on the water, you can easily deflate it, making it much easier to store and transport. It also comes with a **folding paddle with an adjustable blade** that can be adjusted **from 165 to 208 cm**, allowing you to perfectly adjust it to your height.

Comfort and Practicality

The board has **a non-slip deck**, which, thanks to its proper curvature, helps maintain balance even over long distances. The **wide design of the board** makes it easier to maintain balance, making it ideal for long-distance swimming for hours. The **maximum load of the board is as much as 160 kg**, which allows comfortable use even for larger adults.

Mobility and Storage

You will also find **a capacious backpack** in which you can easily store and transport the board and all the equipment. The practical **luggage rack located on the front of the board** makes it easy to carry the most necessary items while sailing. Thanks to this, you can take with you everything you need to fully enjoy your time on the water.

Perfect for beginners and more advanced users

The inflatable SUP board is the perfect solution **for both beginners and more advanced users**. With its durable construction, stability and ease of use, the board **provides comfort and safety on the water**. High-quality materials and thoughtful design guarantee long-lasting use. Whether you prefer to swim standing, sitting or lying down, the board will meet your expectations.
