Price: **184.50 zł** gross / 150.00 zł net

Manufacturer: EXTRALINK

Referention number: DNXGGHHKGRMLLL

Information:

Extralink Dynamite C31 is a wireless mesh network expansion module that allows you to easily extend an existing Dynamite Mesh system or create a new Wi-Fi network from scratch. It provides a stable signal, wide coverage and flexible use as a home router or access point. It supports IEEE 802.11ac/a/n/g/b standards, MU-MIMO technology, has 3 gigabit RJ45 ports and a USB 2.0 port for sharing files and media. The TouchLink function makes it easy to create a secure guest network, and simple installation and configuration via an app or browser takes only a few minutes.

Product features

Product type	Mesh system
Antenna type	Internal
LED indicators	Power
Universal Plug and Play (UPnP)	Yes
Dynamic IP	Yes
Ethernet LAN (RJ-45) ports	3
Static IP	Yes
Reset button	Yes
Wi-Fi band	Dual-band (2.4 GHz / 5 GHz)
Wi-Fi standards	802.11a
Top Wi-Fi standard	Wi-Fi 5 (802.11ac)
Antenna direction type	Omni-directional
Product colour	Blue
Guest access	Yes

Ethernet WAN	Yes
WLAN data transfer rate (max)	2000 Mb/s
DHCP client	Yes
DHCP server	Yes

Full product description

Extralink Dynamite - C31 mesh network extension module

Extralink Dynamite C31 is a wireless router with which **you can expand an existing Dynamite Mesh system** or build a new wireless network from scratch. In both cases, you gain a stable connection signal and a large area of signal coverage. The unit's flexible configuration allows it to be used **interchangeably as a router in a home network or as an access point** to extend the reach of a home mesh network.

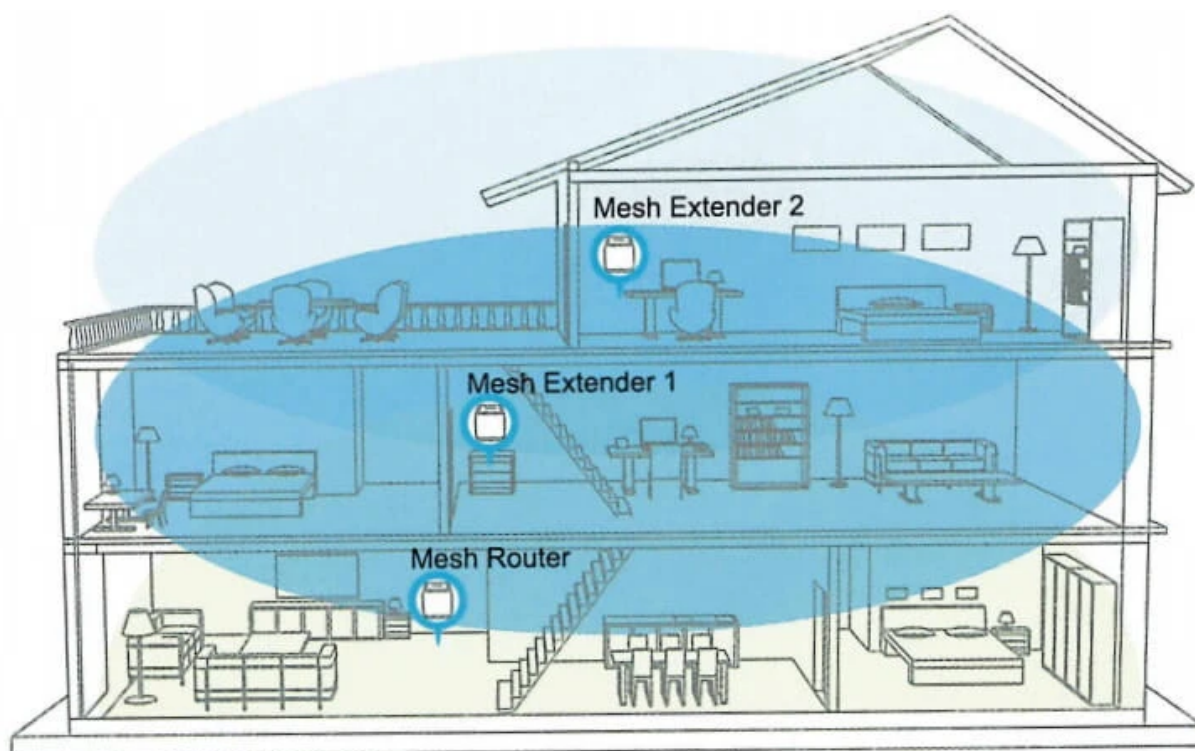

Features:

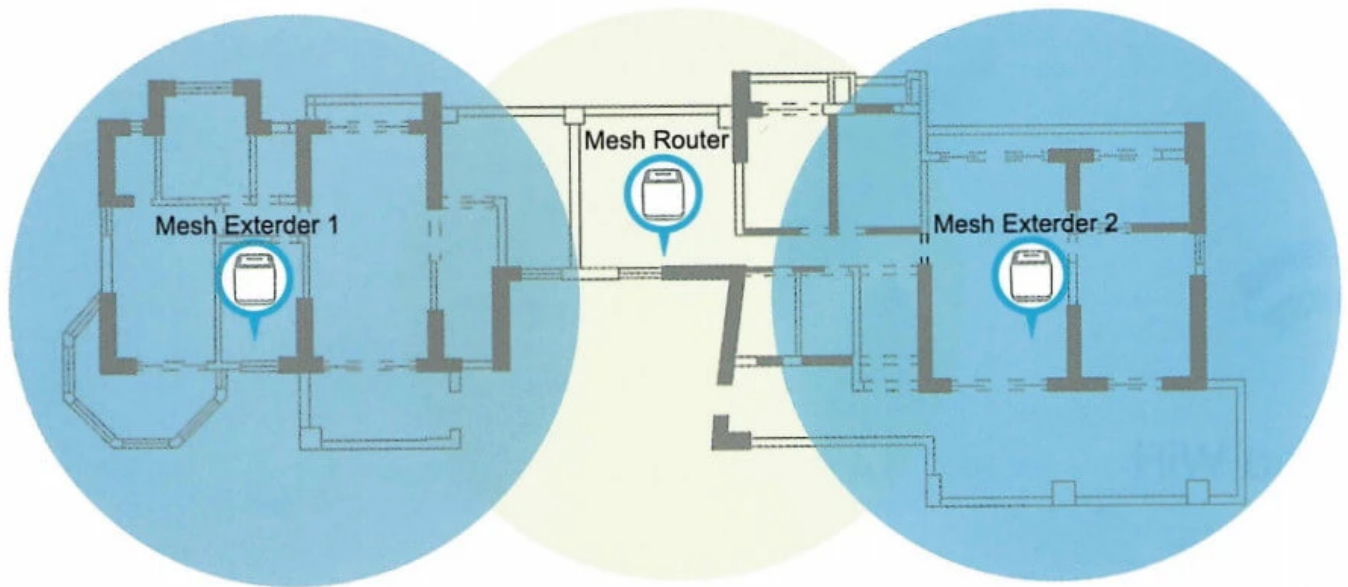

- Expandable to 10 satellites
- Easy installation, easy home Wi-Fi coverage
- Complies with IEEE 802.11ac/a/n/g/b
- 3 RJ45 Gigabit 10/100/1000Mbps ports
- MU-MIMO technology
- USB 2.0 port - share files and multimedia with networked devices
- TouchLink function makes it easy to set up a separate and secure Wi-Fi network for guests
- Quick and hassle-free installation process

Extralink Dynamite Mesh System - reliable wifi mesh system

The Extralink Dynamite Mesh System is a powerful dual-band WiFi Mesh system that provides Internet access to every corner of the home, with no drop in signal quality as the end device moves between Mesh devices. **The Dynamite Mesh system is built so that devices connect to each other within a single Wi-Fi network.** If one of the satellites loses connection, the other units will automatically and seamlessly reconnect to the Internet.

The system chooses the best path for device connections and keeps the network running as fast as possible. The Dynamite MeshC31 provides simultaneous connectivity on **5GHz with a maximum throughput of 1733Mbps (one module), a second 5GHz module with a throughput of 886Mbps and 2.4GHz with up to 300Mbps**, the total available throughput is up to 3000Mbps. Built-in powerful signal boosters provide exceptionally high Wi-Fi coverage and stable throughput, while 4x 7dBi and 2x 5dBi 5GHz antennas and 2 5dBi 2.4GHz antennas provide even better wireless performance.

Easy installation and configuration

We can control the **Extralink Dynamit C31** access point both through mobile devices and also through a web browser. The commissioning process is not very complicated. A simple wizard allows us to configure the device for the first launch, and the configuration itself is a few minutes. We can do it by installing the **MeshGo APP** by downloading it or scanning the **QR** code from the store:

MeshGo APP
