Price: **1,099.01 zł** gross / 893.50 zł net

Manufacturer: EXTRALINK

Referention number: DNXGFOKPMRMNGN

Product features

Storage relative humidity (H-H)	10 - 90%
Product type	Mesh system
Antenna type	Internal
LED indicators	Power
Storage temperature (T-T)	-10 - 70 °C
Humidity measurement range	10 - 90%
Ethernet LAN (RJ-45) ports	3
DC-in jack	Yes
Operating temperature (T-T)	0 - 40 °C
Reset button	Yes
Wi-Fi band	Dual-band (2.4 GHz / 5 GHz)
Wi-Fi standards	802.11a
Top Wi-Fi standard	Wi-Fi 5 (802.11ac)
Product colour	Blue
Ethernet WAN	Yes
WLAN data transfer rate (max)	2000 Mb/s
DHCP client	Yes
DHCP server	Yes

Full product description

Extralink Dynamite | Mesh 3in1 System AC2100, MU-MIMO, Home Mesh WiFi System

Extralink Dynamite is a Mesh WiFi system for home networks, consisting of three devices, providing data transfer rates of up to 2033Mbps and seamless roaming between devices. While the signals of a traditional single Wi-Fi router decreases significantly when passing through two or three walls, the Mesh WiFi system, thanks to its distributed wireless network, shows much higher signal strength and stability over a much larger area. The system is flexible, it can be expanded as needed, up to 10 satellites if needed. Each unit covers an area of up to 350 square meters, while a set of 3 units covers an area of up to 1000 square meters, depending on how you place them in your home.

Features:

- Easy installation, easy coverage of the entire house with Wi-Fi
- Possibility to extend the set to 10 satellites
- Compliant with IEEE 802.11ac/a/n/g/b standards
- 3 RJ45 Gigabit 10/100/1000Mbps ports
- USB 2.0 port - sharing files and media with network devices
- MU-MIMO technology
- TouchLink function enables easy setup of a separate and secure Wi-Fi network for guests
- Fast and trouble-free installation process

Extralink Dynamite Mesh System - a reliable mesh wifi system

The **Extralink Dynamite Mesh System** device is a powerful dual-band Mesh WiFi system that provides Internet access in every corner of the apartment without compromising signal quality as the end device moves between Mesh devices. Dynamite Mesh System is built so that devices connect to each other in one Wi-Fi network. If one of the satellites loses connection, the other units automatically and seamlessly reconnect to the Internet. The system selects the best path for devices to connect and maintains the network to operate as quickly as possible. Dynamite Mesh provides a simultaneous 5GHz connection with a maximum throughput of 1733Mbps and 2.4GHz up to 300Mbps, with a total available throughput of up to 2100Mbps. Built-in powerful signal amplifiers provide exceptionally high Wi-Fi coverage and stable throughput, and 4x 3dBi 5GHz and 2 3dBi 2.4GHz antennas provide even better wireless performance.
