Full product description

Extralink EDITH 16 core fiber optic box

Extralink EDITH 16 core is the equipment used to separate the main fiber optic cable into client cables (in PON technology). Welds, splitter and other mounting accessories can be placed in the housing while maintaining protection and transparency of the network.

Features:

- Tightly closed structure in a nice shape
- Resistant to adverse weather conditions such as humidity, water and dust
- It has mountings for fiber optic and client cables, fiber splicing, storage, distribution, etc. all in one
- Cables, pigtails, patchcords work independently, without affecting each other, installation of cassette-type SC adapters, easy to manage
- The distribution panel can be mounted in reverse, the fiber optic cable can be inserted into the box through a sealed hole
- The enclosure can be installed to a wall or pole, suitable for both internal and external installation
- The set includes 16x - 60mm weld shielding
