Full product description

Extralink ELIZA 16 core - black optic fibre splice closure

Extralink ELIZA 16 core is a **fiber optic cable outlet** used at the point of separation of the main fiber optic cable into client cables, in PON technology. Welds, splitter and other mounting accessories can be placed in the housing, while maintaining protection and transparency of the network.

Features:

- Tightly enclosed structure in a functional enclosure
- Resistant to adverse weather conditions such as humidity, water and dust
- It has fixings for fiber optic cables and client cables, is used for their storage and distribution
- Cables, pigtails, patchcords work independently, without affecting each other, and installed SC cassette-type adapters are easy to manage
- The distribution panel can be mounted in reverse, the fiber optic cable can be inserted into the box through a sealed hole
- The housing can be installed on a wall or pole, suitable for both indoor and outdoor installation
- 16 x - 60 mm weld seam cover included
