Full product description

Charge wherever you are - Extralink EV-ANS-EVA03 EV Charger

The **Extralink EV-ANS-EVA03 EV Charger** is a practical solution for drivers who want full control over the **charging** process. With **3.5 kW of power**, **adjustable current** (6-16A) and **built-in OLED display**, you have full visibility of charging parameters in real time.

Mobility and easy connection - a charger for anywhere

With a **Schuko connector**, the **ev charger** can be plugged into a standard 230V electrical outlet. This means you can **charge your car anywhere** - in the garage, in the parking lot, or while traveling. **The 5-meter cable length** ensures freedom of use, even when access to an outlet is limited.

Full control over the charging process

The **built-in OLED display** allows you to track the charger's charge level, voltage, amperage and temperature in real time. You can **adjust the charging current from 6-16A** to suit your needs and the capabilities of the electrical grid. **Counting the energy consumed** allows you to monitor your total power consumption, making cost planning easier.

Vehicle protection and operational safety

Ev-ans-eva03 ev charger is equipped with advanced protection systems against overvoltage, short circuit, overload and overheating. **With built-in leakage current monitoring** (RCMU 30mA DC), **the device automatically cuts off power** when an abnormality is detected. The IP67-rated enclosure protects the charger from dust and splashing, making it suitable for use in a variety of conditions.

Intuitive operation and convenient use

The RGB LED indicator shows the current charging status, eliminating the need to constantly check the parameters. **Compact dimensions** (210 x 88 x 50 mm) and **weight of 2.9 kg** make the charger easy to store and transport. **An automatic shut-off mode** ensures energy savings when the charging process is complete.
