Product colour	Black

Full product description

Extralink EMILY 16 CORE fiber optic closure

Extralink EVA 16 core is the equipment used to separate the main fiber optic cable from the client cable (in PON technology). Welds, splitter and other mounting accessories can be placed in the housing while maintaining protection and transparency of the network.

Features:

- 16 fibres can be installed
- Removable connection tray for easy installation
- Many adaptor options are available
- It accepts, among other things, distribution cables and cables with pre-clips.
- Protection against bending radius
- Removable door for easy installation
- Can supplied with 16 heat shrink welds and other components

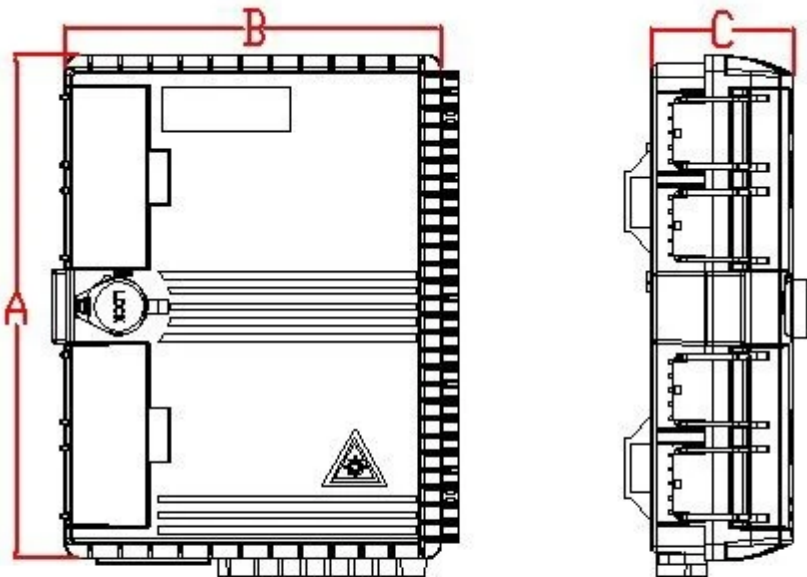

Uses:

- Data centres, premises installations, telecommunications networks
- Ethernet, fiber channel, ATM, LAN, MAN and WAN
- ICT and telecommunications networks
- Wall/post mounting
- Indoor and outdoor use
