Price: **184.50 zł** gross / 150.00 zł net

Manufacturer: EXTRALINK

Referention number: DNXGFMLOERMMII

Product features

Antenna type	Sector antenna
Antenna gain level (max)	15 gain
Front to back ratio	25 decibel
Package type	Box
Frequency band	5 GHz
Water-resistant	Yes
Antenna gain (5 GHz)	15 gain
Antenna connector type	N-type
Connector gender	Female
Designation	Outdoor

Full product description

Welcome to the world of exceptional quality and reliability with the Extralink EXSEC15-90 product

The Extralink EXSEC15-90 is a sector antenna with impressive performance, designed for superior performance. With an energy gain of 15dBi and a beamwidth of 90°, it offers not only wide coverage, but also a stable connection in all conditions.

High performance

Extralink EXSEC15-90 provides an exceptional **energy gain of 15dBi**, which guarantees a stable and strong connection. The use of 5GHz MIMO 4x4 technology allows simultaneous data transmission on multiple channels, increasing network throughput. Dedicated to the Mimosa A5C, this antenna is an ideal choice for professional network solutions.

Wide coverage angle

The Extralink EXSEC15-90 sector antenna offers a horizontal beamwidth of 90°, allowing it to **cover large areas**. This makes it ideal for outdoor applications where wide coverage is crucial. This makes the product versatile and can be used in a variety of field conditions.

Durability and reliability

The Extralink EXSEC15-90 product is designed for **long-term use in harsh environments**. Its waterproof design and >20 dB cross polarization isolation ensure stability and reliability even in extreme weather conditions. This ensures that your network will operate without interference.
