Price: **25.52 zł** gross / 20.75 zł net

Manufacturer: EXTRALINK

Referention number: DNXGGMPQKRMNIL

Product features

Product type	Filament refills
Height	50 mm
Width	250 mm
Depth	170 mm
Material	Plastic
Product colour	Black
Product weight	350 g

Full product description

High quality PLA filaments for your 3D pen

High-quality PLA filaments are the ideal choice for anyone who wants to realize the full potential of their 3D pen. Made from a starchy material derived from renewable plant resources, these filaments are non-toxic, odorless and completely biodegradable. This makes them not only environmentally friendly, but also safe for children and adults. In addition, the filaments contain no air bubbles and are not easily broken, ensuring trouble-free use.

Excellent 3D printing results

With PLA filaments you will achieve excellent 3D printing results. The wire is smooth and easy to shape, allowing you to create precise lines with vivid colors. This makes printing fun and efficient, providing the best user experience.

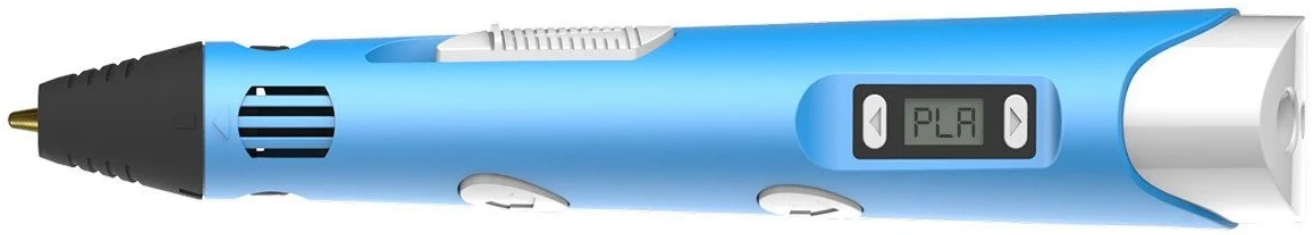

Filament in 20 colors

The 3D PLA filament cartridges offer up to 20 colors, allowing you to let your imagination and creativity run wild. With this variety of colors, you can enjoy the fun of creating 3D art and painting. 3D PLA filament in 20 colors is the best choice for creating unique 3D art masterpieces that will impress with their design and colors.

Wide compatibility

PLA filaments are compatible with both 3D printers and 3D pens that use 1.75 mm diameter filament. They provide the best flow through the nozzle, making the printing process smoother and the finished product smoother and more aesthetically pleasing. The printing temperature range is 190° to 220°, which allows for a wide range of applications in various 3D printing devices.

The perfect gift

The 1.75mm diameter 3D printer filament is an ideal gift for children and art lovers. It helps develop creativity, imagination and artistic skills and spatial thinking. It is also a great way for parents and children to spend time together, share happy moments and build a bond with their children. PLA filaments for 3D pens are not only a tool for creation, but also an inspiration for developing passions and talents.
