Full product description

Lightweight and versatile device

This projector is a **breakthrough in the gaming market** - a compact, lightweight device. It allows you to **play on the big screen wherever you want!** **Quad-core ARM Cortex-A53** processor will ensure **smooth gameplay**. The projector is equipped with **Android 11.0 operating system**, which allows you to use the **Google Play Store**, and applications such as **Netflix, Youtube, Spotify** and **Google Chrome browser**.

Image Quality and Resolution

With **160 ANSI lumens of brightness** and a high **1500:1 contrast** ratio, the projector offers **intense and realistic colors**, even in less darkened rooms. The native resolution of **1280x720p** is ideal for gaming or watching movies. **Screen diagonal: 40-130 inches** - allows you to display images in small and larger rooms.

Connectivity and Utility Features

The projector includes **modern connectivity features** for convenient operation. **Dual-band WiFi6 and Bluetooth 5.0** enable fast network connection and wireless data transfer to other devices. In addition, **HDMI and USB connections** allow you to connect gaming consoles, computers and a variety of multimedia devices. The projector has a **Micro SD port** for playing movies, music and games. **Remote control and an easy-to-use control panel** make using the projector a breeze, and the **Keystone correction** function allows you to accurately adjust

the image, even at unusual projection angles.

Image Adjustment and Comfort

With **manual focus adjustment** and a **360-degree image rotation** option, the projector can be customized to suit any room and user preference. It supports a variety of aspect ratios, including **16:9** and **4:3**, allowing the projected image to adapt to different types of content. In addition, the ability to project from **1.2 to 4 meters** and an **optimal distance of 1.68 meters** provides flexibility for positioning the device in different spaces. In turn, **the low fan noise level (less than 25 dB)** ensures comfort during intense gaming sessions.

Durability and Energy Efficiency

The **Smart Projector** ensures longevity with a **lamp life of up to 50,000 hours**. The **60W** lamp type and **low power consumption** make

the device **energy efficient**. The device has also gained multimedia playback capabilities, allowing you to display your favorite photos and listen to music in **excellent quality**.
