Information:

Extralink G-526 is a black-and-white gaming chair with a bucket seat that combines ergonomics, comfort and a modern look. Equipped with neck and lumbar cushions, armrests, height adjustment and a reclining backrest in the range of 90°, 120° and 135°, it provides comfort while gaming, working and resting. Resilient foam, upholstery made of fabric and eco-leather, and a metal five-star base guarantee durability and stability. The chair has a load capacity of up to 150 kg, and the extendable footrest increases relaxation comfort.

Full product description

Extralink G-526 - black-and-white gaming chair with footrest

The **Extralink G-526** gaming chair combines a bucket-style design, a wide range of adjustments and features that support a comfortable position while gaming, working and resting. The black-and-white upholstery gives it a distinctive look that fits well with a computer setup, gamer room or home office.

Bucket-style design and ergonomic support

The contoured seat helps maintain a stable position, while the included neck and lumbar cushions let you adjust the type of support to the user's needs. The chair is also equipped with armrests, height adjustment and a reclining backrest mechanism, making it easy to change the setting during work, gaming or watching a film.

- **Bucket seat** stabilising the body.
- **Neck cushion** supporting a comfortable position for the head and neck.
- **Lumbar cushion** helping to support the lower back.
- **Armrests** allowing a comfortable position for the arms.
- **Height adjustment** making it easier to match the chair to the desk.

Materials suited to everyday use

The chair seat is filled with **resilient foam resistant to deformation**, which helps maintain comfort during longer periods of sitting. The upholstery combines fabric with faux leather, giving the chair an attractive appearance while making the surface easy to keep clean. The carefully contoured backrest complements the bucket-style character of the design.

Stable base and load capacity of up to 150 kg

The metal five-star base ensures the chair remains stable during everyday use. The gas lift allows smooth height adjustment, and the maximum permitted load is **150 kg**. The design is suitable both for calm desk work and dynamic gaming sessions.

- **Maximum load:** 150 kg.
- **Metal base:** five-star design.
- **Gas lift:** smooth chair height adjustment.
- **Castors:** allow the chair to be moved freely.

Chair for gaming, work and relaxation

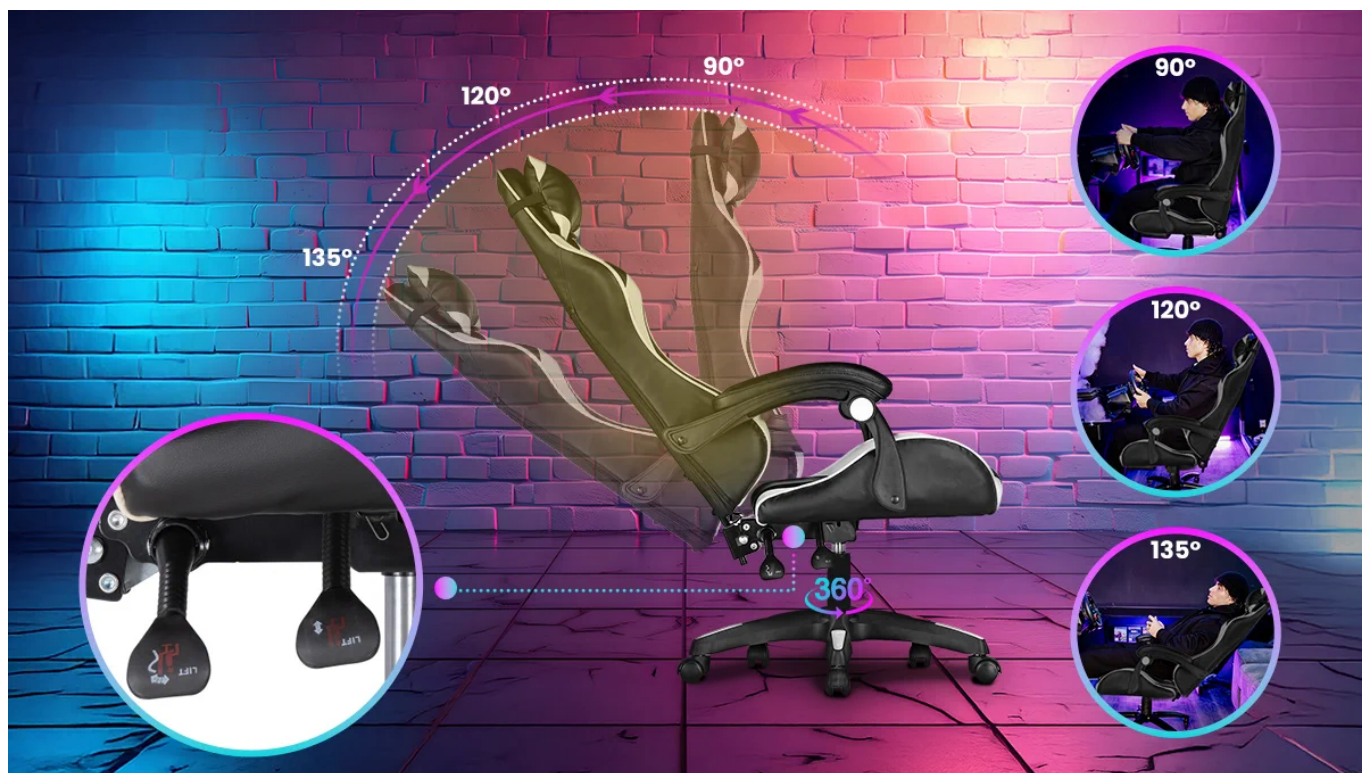

The Extralink G-526 can be used with a desktop computer, laptop or console setup. The adjustable backrest lets you move from a working position to a more relaxed one, so the chair is suitable not only for gaming, but also for studying, remote work, watching films and resting.

Adjustable backrest and chair height

The adjustment mechanism allows the backrest to be set at **90°**, **120°** or **135°**. The upright position is ideal for work and gaming, while a greater recline angle makes it easier to relax. The chair height can be adjusted within the range of **112-122 cm**, helping to match it to the user's height and the desk height.

- **90°**: a position suitable for work, study and intense gaming.
- **120°**: a more relaxed setting for watching content or resting.
- **135°**: a more reclined position intended for relaxation.

Dimensions and key features of the Extralink G-526

The chair's well-thought-out proportions make it possible to create a comfortable gaming or work station. The model offers **height adjustment**, a **reclining backrest**, **two support cushions**, **soft armrests** and a **stable base**. The maximum load of 150 kg makes the chair suitable for a wide range of users.

- **Chair height:** 112-122 cm.
- **Backrest adjustment range:** 90°, 120° and 135°.
- **Maximum load:** 150 kg.
- **Cushions:** neck and lumbar.
- **Upholstery:** fabric and easy-to-clean faux leather.
- **Base:** metal, five-star.
- **Colour:** black and white.

Pull-out footrest included

The chair comes with a **pull-out footrest**, allowing you to comfortably rest your legs during a break, while watching a film or after gaming. When not needed, it can be slid under the seat so it does not take up extra space. The footrest complements the adjustable backrest and increases the chair's functionality during relaxation.
