Information:

Extralink G-523 is an ergonomic gaming chair in a black-and-blue style, designed for gaming, work, study and relaxation. The bucket seat, upholstered armrests and head and lumbar cushions provide comfort and spinal support during long periods of sitting. The chair offers height adjustment, a reclining backrest and a swivel seat, as well as a pull-out footrest for even greater comfort. The sturdy metal five-star base ensures stability, while the resilient filling and combination of fabric with eco-leather make everyday use and cleaning easier. Maximum load is 150 kg.

Full product description

Extralink Gaming Bucket Seat Gaming Chair Black and Blue G-523

The Extralink G-523 gaming chair combines functionality with a striking black-and-blue design. Its ergonomic construction helps maintain a comfortable position while gaming, working, studying, watching films and resting.

Key features of the Extralink G-523 chair

The contoured seat, additional cushions and adjustment functions make it easy to adapt the chair to the way it is used and to individual needs.

- The contoured bucket seat helps stabilise the body.
- Comfortable armrests provide support for the arms.
- The head cushion supports the cervical spine.
- The lumbar cushion helps maintain a comfortable back position.
- Height adjustment allows the chair to be matched to the desk and the user's height.
- The reclining backrest lets you switch from a working position to a resting one.

Robust construction

The chair has been designed for frequent use. The resilient filling helps reduce deformation, and the upholstered surfaces are easy to keep clean. The five-star base ensures stable positioning of the chair.

Ergonomic support while sitting

The bucket-style design helps keep the body in the correct position, while the headrest and lumbar cushion provide additional support for the neck and lower back. This solution works well during hours of gaming, computer work and studying.

- **Head cushion:** helps relieve the cervical spine.
- **Lumbar cushion:** supports the natural position of the lower back.
- **Bucket seat:** helps stabilise the user's position.
- **Soft filling:** increases comfort during longer periods of sitting.
- **Metal base:** contributes to the stability of the entire structure.
- **Maximum load of 150 kg:** allows users of different body types to use the chair.

For gaming, work and relaxation

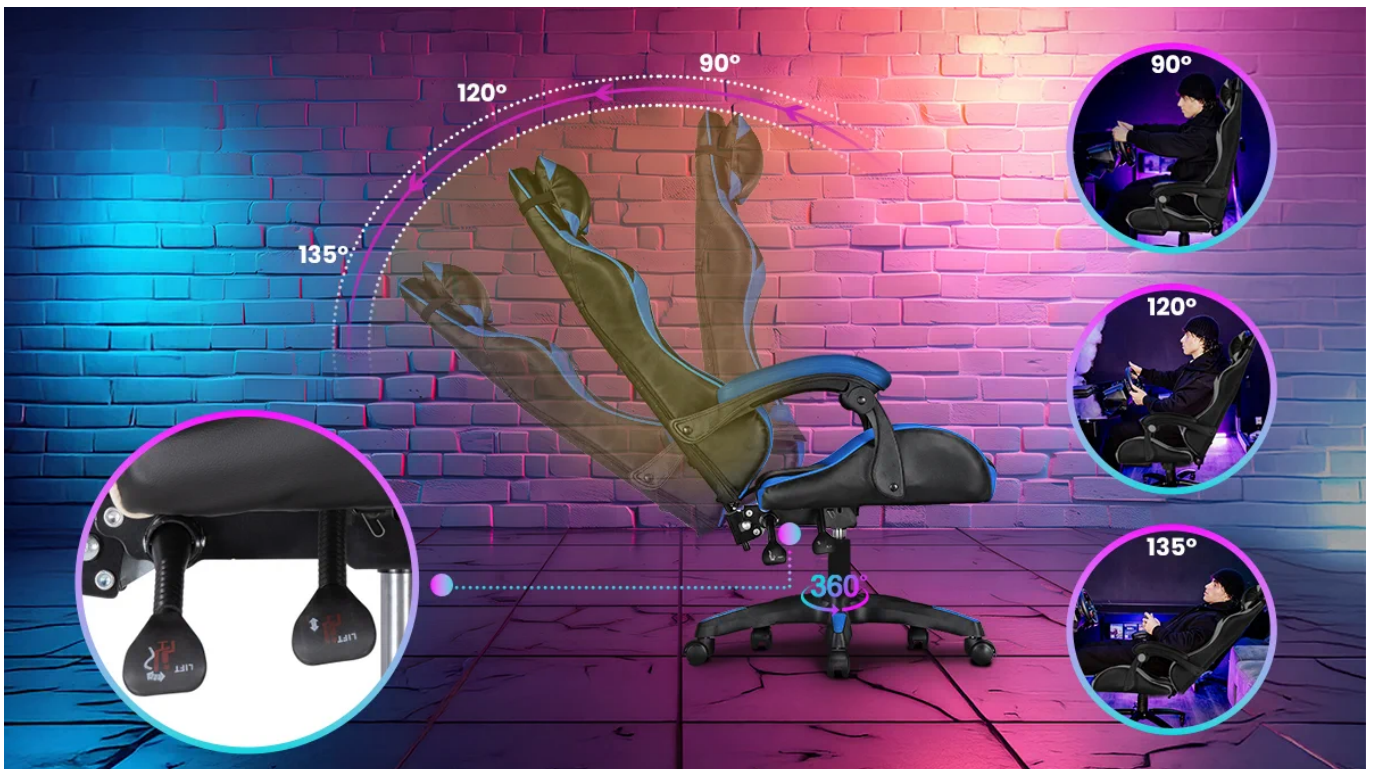

The Extralink G-523 is suitable for desktop computers, laptops and Xbox and PlayStation consoles. The reclining backrest lets you comfortably change position while watching a film, listening to music or taking a short break from work.

Adjustment tailored to the user

The adjustment mechanisms allow the chair to be adapted to the task at hand. The user can change the height of the structure and set the backrest angle to suit gaming, work or relaxation.

- **Adjustable height:** allows the seat position to be matched to the desk.
- **Chair height range 112-122 cm:** allows the structure to be adapted to users of different heights.
- **Backrest angle adjustment:** offers positions suitable for work and relaxation.
- **Swivel seat:** makes it easy to move freely at the workstation.
- **Five castors:** allow the chair to be moved without having to lift it.

Why choose the Extralink G-523 chair?

The chair combines a bucket-style design, adjustable backrest, soft filling and additional cushions supporting the neck and lumbar region. The black-and-blue colour scheme fits well with gaming setups, teenagers' rooms and home offices.

- Two cushions supporting the neck and lumbar region.
- Resilient filling resistant to deformation.
- A combination of fabric and easy-to-clean eco-leather.
- Smooth backrest tilt adjustment.
- Chair height adjustment.
- Stable five-star base.
- Upholstered armrests.
- Maximum load of 150 kg.
- Black-and-blue styling to suit a gaming setup.

Pull-out footrest for greater comfort

The built-in pull-out footrest allows your legs to be comfortably supported after reclining the backrest. This solution is useful when watching films, resting between gaming sessions or taking a short break from work. When the footrest is not needed, it can be slid under the seat so it does not take up extra space.
