Information:

Extralink Home GL-624 is a modern wheeled grill combining mobility, convenience and functionality. The solid stainless steel construction ensures durability and corrosion resistance, while the stable lockable wheels make it easy to move safely. The closing lid allows better temperature control, making dishes juicier and tastier. The grill is also equipped with handles that protect against burns and a practical lower shelf, which increases ease of use.

Full product description

Extralink Home GL-624 - Grill on Wheels

The Extralink Home **GL-624** is a **modern grill on wheels** that combines **convenience of use and functionality**. Designed for barbecue lovers who appreciate mobility, ease of use and additional features such as a lockable **lid and shelf at the bottom**.

Design and construction

The **GL-624** grill features a **sturdy construction made of high-quality stainless steel**. Thanks to its modern design and careful workmanship, the grill not only looks great, but is also extremely durable and corrosion-resistant.

Mobility

One of the biggest advantages of the GL-624 is its **mobility**. Equipped with **sturdy casters**, the grill can be easily moved to any location, making it adaptable to different conditions and users' needs. Sturdy casters with a locking mechanism ensure safety during use.

Security

The **GL-624** grill was designed with **user safety** in mind. Sturdy construction, stable locking casters and special handles to prevent burns make the use of this grill safe and comfortable.

Lockable lid

One of the key features of the **GL-624 grill is the lockable lid**, which allows you to control the temperature inside the unit. This allows you to prepare food more efficiently, preserving its juiciness and flavor. A built-in thermometer on the lid allows you to accurately monitor the temperature.
