Price: **69.99 zł** gross / 56.90 zł net

Manufacturer: EXTRALINK

Referention number: DNXXGMIQERMMII

Information:

Extralink Home K4 is an electronic kitchen scale with a weighing range of up to 5 kg and an accuracy of 1 g, ideal for cooking, baking and portioning food. The tare function allows ingredients to be weighed in a bowl, cup or on a plate without including the weight of the container. DMS sensors ensure precise and repeatable measurements, and the blue backlit LCD screen makes reading easy in various conditions. The round metal platform is practical and easy to clean, while the compact design saves space on the worktop.

Full product description

Kitchen scale K4

Extralink Home K4 is an electronic kitchen scale with a weighing range of up to 5 kg and 1 g increments. It makes it easy to measure ingredients when cooking, baking and preparing desserts. The round platform allows you to use bowls, cups and other kitchen containers.

Useful tare function

The tare function allows you to zero the weight of the container placed on the platform. This means that only the weight of the contents is shown on the display, making it easier to measure ingredients directly in a bowl, cup or on a plate.

Accuracy to 1 g

DMS sensors help achieve repeatable results when measuring food products. The 1 g increment allows you to control portions of coffee beans, dried fruit, spices, fruit and other ingredients used in everyday meal preparation.

Help with baking

A weighing range of up to 5000 g means the device can be used to measure both small additions and larger portions of ingredients. The scale helps maintain the correct proportions of flour, sugar and other ingredients needed to prepare dough.

Backlit LCD display

The LCD display with blue backlighting makes it easy to check the result in different lighting conditions. The clear control panel lets you quickly switch on the device, zero the reading and prepare the scale for the next measurement.

For everyday measurements

Extralink Home K4 is useful when cooking, baking, portioning food and preparing coffee. Its compact design takes up little space on the kitchen worktop, and the metal platform is easy to wipe clean after weighing.
