Information:

The Extralink Home NT1 electronic scale is a versatile device for weighing small animals, kitchen ingredients, fruit, vegetables and small parcels. It offers a measuring range from 2 to 10 000 g, a maximum load of 10 kg and high accuracy of 1 g, allowing precise control of mass and portions. The shaped, removable tray measuring 295 x 185 mm ensures convenient use, while the tare function makes it easy to weigh products in containers. A clear display, unit conversion, non-slip feet and automatic switch-off increase comfort and save energy.

Full product description

Weighing small animals

The Extralink Home NT1 electronic scale makes it possible to monitor the weight of small animals weighing up to 10 kg. The contoured tray measuring 295 x 185 mm provides space for a cat, a small dog, a parrot or a hamster. A measuring accuracy of 1 g helps observe changes in the animal's body weight.

Measuring ingredients

The NT1 model can also be used as a kitchen scale. The measuring range from 2 to 10,000 g makes it possible to weigh flour, butter, eggs and other ingredients needed when preparing meals. The tare function allows the weight of the bowl or other container to be ignored.

Help with packing

A maximum load of 10 kg means the scale can also help when preparing small parcels. The clear display makes it easy to check the result, and the ability to change units allows measurements to be shown in grams, millilitres, ounces, and pounds and ounces.

Weighing fruit

The wide tray makes it easy to place fruit directly on the scale. The 1 g accuracy helps measure portions and ingredients according to the recipe being prepared. Two buttons located on either side of the display allow you to operate the device's available functions.

Vegetable portions

The Extralink Home NT1 scale is ideal for weighing vegetables and preparing food portions. The contoured edges of the tray help keep products on the weighing surface, while the non-slip feet contribute to stable placement of the device on the worktop.

Removable tray

The removable tray makes it easier to prepare the scale for use and to store it. The housing is made of ABS plastic, and the device is powered by two AAA batteries. The automatic shut-off function helps reduce unnecessary energy consumption after weighing is finished.
