Manufacturer: EXTRALINK

Referention number: DNXGJOONHRMMPK

Information:

Extralink Home P13 is a compact jewellery scale with 0,01 g accuracy, ideal for weighing jewellery, coins, stones, beads and small items such as herbs or spices. A minimum measurement of 0,05 g and the tare function make precise measuring easy without including the container. The device offers calibration and selection of g, oz, ozt, t, dwt, ct and gn units. A clear LCD screen with blue backlighting ensures easy reading, while the closable, compact design protects the scale during storage and makes transport easier. Powered by 2 AAA batteries and automatic shut-off, it offers added convenience.

Full product description

Jewellery Scale P13

Extralink Home P13 is a compact electronic scale designed for weighing jewellery and other small items. The 0.01 g graduation makes it easy to monitor the mass of rings, stones, coins and small materials, while the foldable design helps protect the platform and control panel during storage.

Measuring Small Quantities

The minimum supported weight is 0.05 g, which makes it possible to measure small amounts of dried herbs, spices and other light products. The tare function lets you ignore the weight of a small container and check the weight of the contents alone.

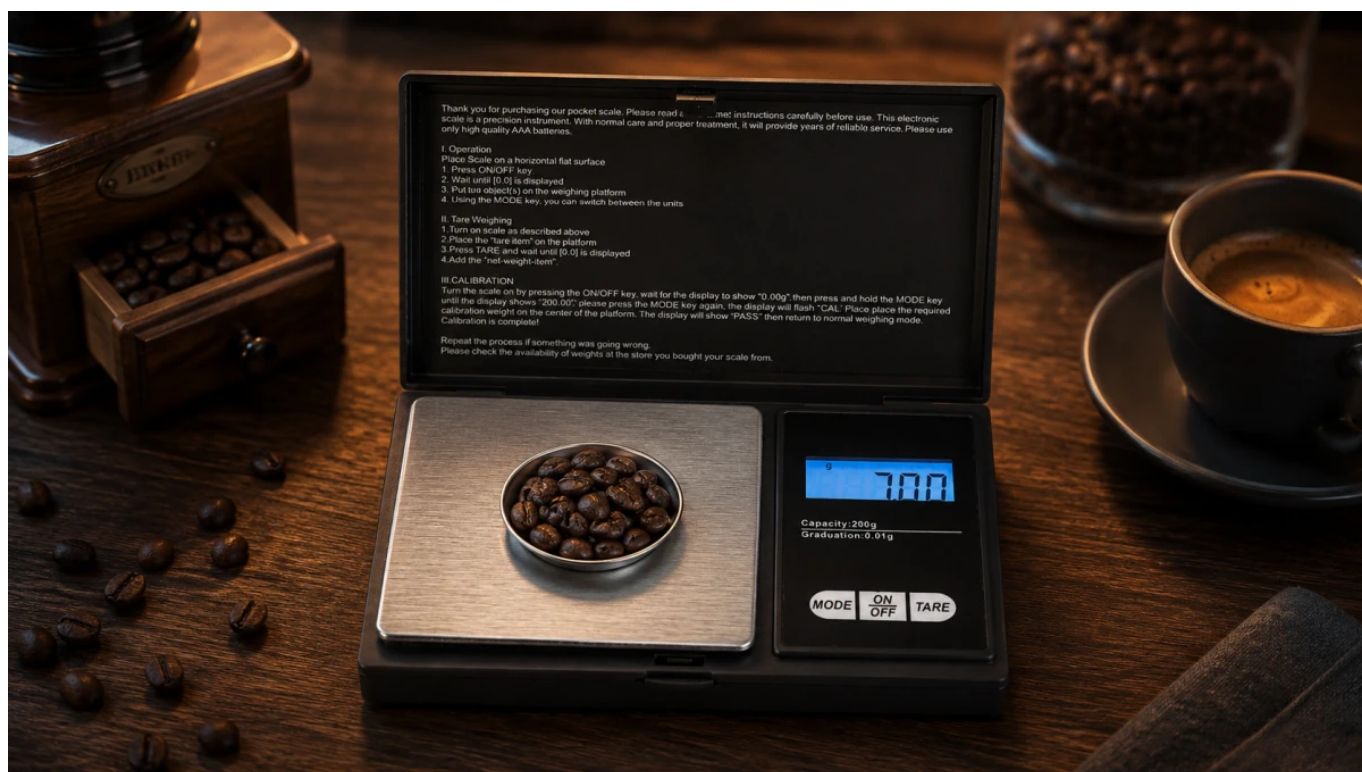

Accuracy to 0.01 g

The 0.01 g graduation helps control the mass of jewellery stones, beads and components used in jewellery making. The calibration function allows the device to be prepared for subsequent measurements and helps maintain consistent readings.

Different Measurement Units

The MODE button allows switching between g, oz, ozt, t, dwt, ct and gn units. This makes it possible to match the way the result is displayed to the type of product being weighed — from coffee beans and spices to jewellery, coins and collector's items.

Clear LCD Screen

The LCD display with blue backlighting makes it easy to read the result even in low light. Separate MODE, ON/OFF and TARE buttons help you quickly switch on the scale, change the unit and zero the container weight.

Portable Design

The housing, measuring $7.6 \times 12.8 \times 2$ cm, makes it easy to store the scale in a drawer or carry it in a bag. The device is powered by two AAA batteries, which are not included. Automatic switch-off after one minute of inactivity helps reduce power consumption.
