Full product description

Discover the magic of the cosmos

The star projector is not only a decorative device, but also **a magical window into the cosmos**. With **thousands of twinkling stars**, the projector transports you to the **fascinating world of stars and planets**, creating an extraordinary atmosphere of relaxation and serenity.

Star projector

Compact
size

Star and
nebula projection

Adjustable
brightness

360°
rotation function

Timer

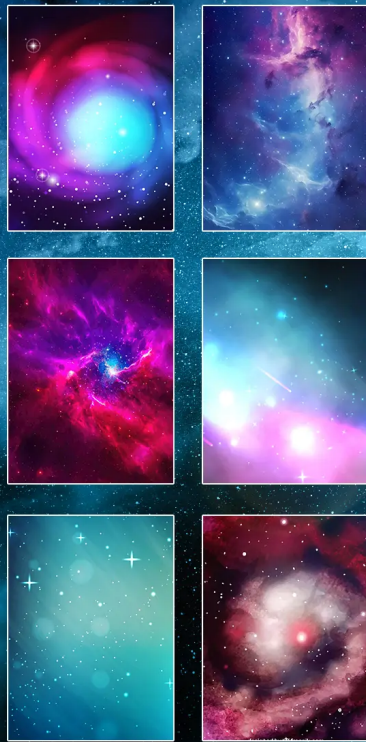

Features:

- Star and Nebula Projection:** Project realistic images of a sky full of stars and nebulae on your wall or ceiling, giving you the impression of looking into the night sky.
- Adjustable Brightness:** Adjust the brightness of the projection to your preference to create the right atmosphere for relaxation or to create a backdrop for sleeping.
- Display Modes:** Choose from a variety of display modes such as single stars, nebulae or mixed effects to match the projection to your mood.
- 360° Rotation Function:** Enjoy a full view of the sky with a 360-degree rotation feature that makes projection dynamic and fascinating.

Choose from a variety of display modes

such as single stars, nebulae or mixed effects to suit your mood.

Safety and multifunctionality:

The **3R** laser class and **523nm laser wavelength** ensure safe use, especially important for children's projection. In addition, **adjustable rotation speed** and a **variety of projection modes** make the projector a **versatile and fun tool for relaxation and entertainment**.

360° rotation

Rotatable by 360°, the nebula's speed, brightness and colour can be adjusted, make it your dream galaxy.

360° rotation
function

Child Friendly:

Star projectors are not only for adults. With the ability to reduce the brightness of the projection, the device can act as a pleasant bedside lamp for children who do not like to sleep in total darkness.

Versatile application of the star projector

Innovative Power Supply:

The projector is equipped with an input power supply of AC 100-240V 50/60Hz 150mA and an output power supply of USB DC 5V max 1A 5W, which allows flexible use of the device in different places and situations.
