Full product description

An enchanting starry spectacle

Immerse yourself in **the infinity of the cosmos** without leaving home with this **advanced projector** that offers highly realistic projections of the starry **sky and galaxy**. Transport your space to the far corners of the universe as you enjoy the peaceful yet mesmerizing view of stars and nebulae, perfect for relaxation and meditation

Czarujący gwieździsty spektakl

Ten wyjątkowy projektor gwieździstego nieba, wykonany w kształcie astronauty, maluje przestrzeń kolorowymi i nieprzewidywalnymi mgławicami, galaktykami w wysokiej rozdzielczości i delikatnie migoczącymi gwiazdami.

Multifunctional Application:

Wielofunkcyjne zastosowanie projektora

Projektor jest idealnym rozwiązaniem zarówno dla dzieci, jak i dorosłych

Dzięki różnym trybom wyświetlania mgławicy i gwiazd, świetnie sprawdza się podczas imprez

Może być używany jako uspokajająca nocna lampka w sypialni dziecięcej

Features of the star projector

The projector offers **many** customizable **features**. Advanced projection controls allow you to **change the colors, speed and brightness of the projected effects**, as well as program **an automatic shut-off after 45 or 90 minutes**, which is ideal for when you're falling asleep. It includes up to **17 different nebula and star projection modes** that can be run individually or in combination to create unique visual effects.

GŁOWICA OBRACAJĄCA SIĘ O 360 STOPNI

Projektor może rzucać obrazy na dowolną powierzchnię,
bez ograniczeń kierunkowych, co pozwala na maksymalne
wykorzystanie możliwości projekcyjnych w różnych przestrzeniach.

Technology and Controls

The projector was designed with **ease of use and functionality in mind**. The **head and body of the device are connected by magnets**, allowing you to quickly separate them from each other and **adjust the projection angle**. The options for turning on and controlling the projector are twofold: **manual buttons located on the back of the unit** allow simple operation of the on/off function, as well as changing the projection **modes from nebulae to stars**. In addition, the **remote control** provides full control over colors, rotation speed, brightness of nebulae and stars, and allows you to set a timer.

The Perfect Gift Idea

The projector makes an excellent gift **for children and adults, stimulating curiosity and interest in astronomy**. It can serve as an educational tool, introducing users to the fascinating world of space science. It is a fantastic choice for birthdays, holidays and other occasions.
