Full product description

Fastest next-generation DVB-T2 HEVC H.265 tuner

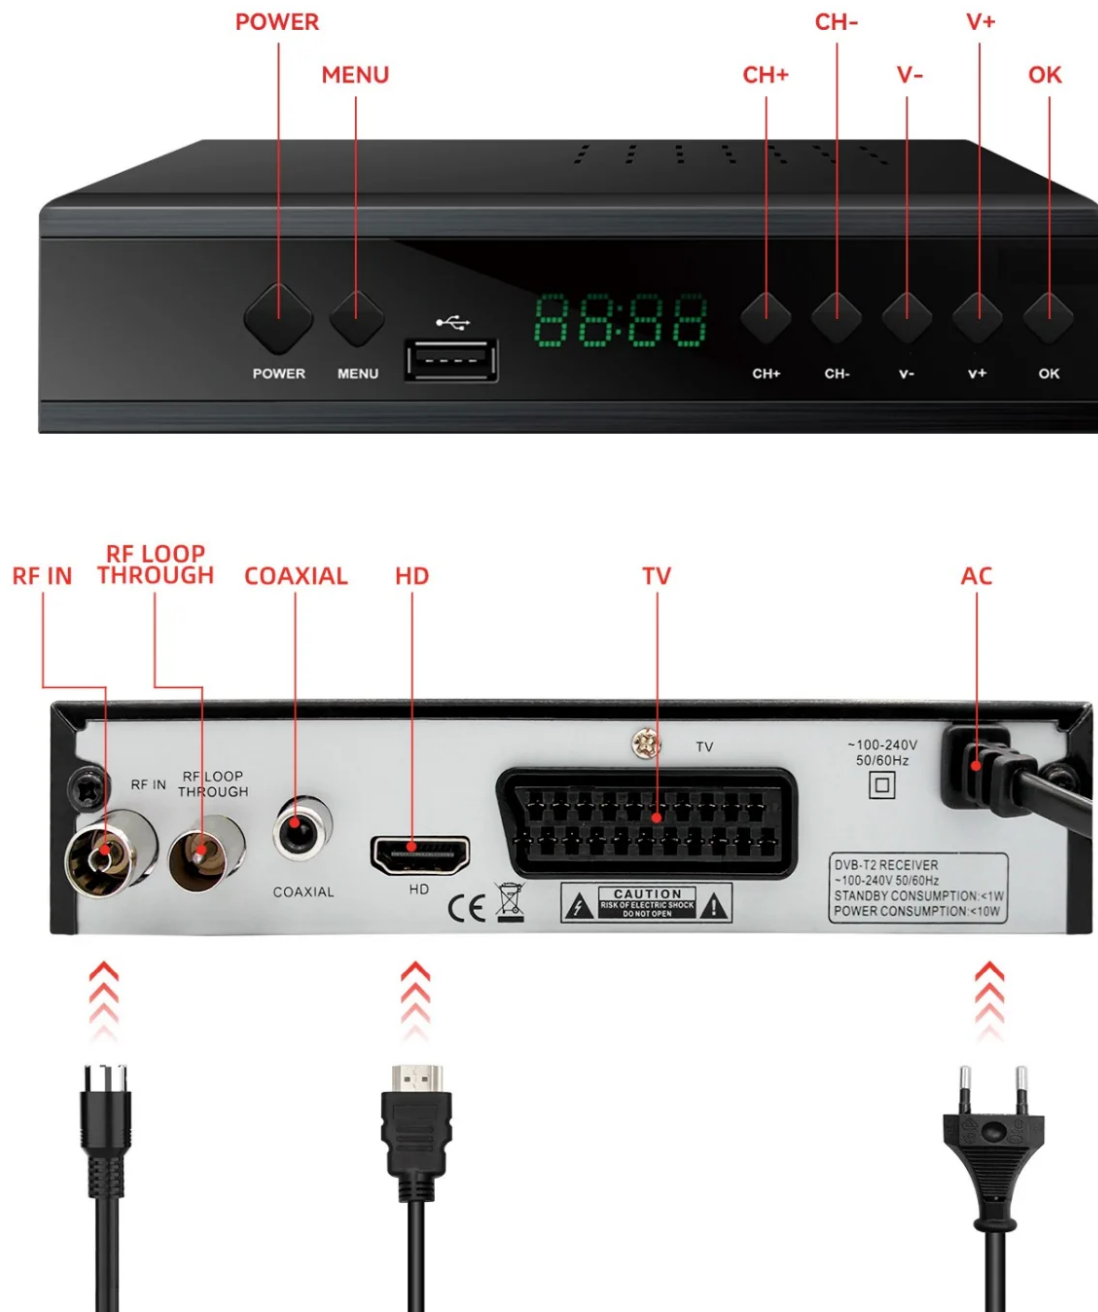

Modern decoder of the highest quality, designed to receive digital terrestrial television programs, compliant with the latest DVB-T2 / HEVC / H.265 standard. The device has an elegant numerical display and buttons on the front panel, which significantly increases the comfort of use.

The decoder, which is adapted to the new DVB-T2 / HEVC / H.265 (and H.264) standard, offers excellent FullHD audio and video quality. The device guarantees reliable reception of MUX1, MUX2, MUX3, MUX4, MUX6 and MUX8.

Additional features and benefits

- Can connect an external WiFi adapter.
- Functions as a USB media player, supporting photos, music and movies
- TIMESHIFT function allows you to pause and rewind the picture
- PVR with recording programming provides convenient recording of programs
- Electronic program guide (EPG) makes it easy to view available content
- Support for teletext, subtitles and news
- Favorite channel list and channel list management
- HDMI and SCART outputs
- Operation of the tuner and TV with a single remote control, equipped with 4 programmable buttons
- Durable metal housing effectively dissipates heat and prevents overheating
- Menu available in Polish

The compact size of the decoder allows it to be conveniently installed next to the TV without taking up much space. Clear numeric display clearly shows the channel number or time (option to be set in the decoder menu), which allows you to easily see the information even from a distance
