Information:

The Extralink Home protective mat for an induction hob is a practical solution that protects the surface from scratches and damage, while also increasing the comfort and safety of everyday cooking. Made from durable silicone resistant to temperatures from -30°C to 260°C, it works perfectly with hot cookware. It is easy to keep clean, as it can be wiped with a damp cloth or washed in the dishwasher. Its versatile use means it will also come in handy in other areas of the home.

Full product description

Extralink Home induction hob protection mat

The kitchen is the place where we cook, prepare meals and spend time with loved ones every day. To enjoy the functionality of the equipment, it is worth taking care of its proper protection. **Protective mat for induction hob** Extralink Home is a simple solution that will help keep your kitchen **clean** and **safe**. Thanks to it you will minimize the risk of damage to the surface of the induction hob and make its use comfortable for a long time.

Scratch protection

Protective mat for induction hob effectively **protects the surface of** the hob from **scratches** and damage. Thanks to the use of high-quality **material** (silicone), the mat absorbs possible impacts and protects against the harmful effects of various objects. **Protection** against scratches is a particularly important feature in heavily used kitchens, where we often have to deal with pots and dishes that can inadvertently damage **the surface of** the induction hob.

to size

Resistance to high temperatures

Extralink Home's protective mats are designed with **high temperatures** in mind. With **silicone** that can withstand a range of -30°C to 260°C, the mat can easily handle hot cookware you remove from an induction cooktop. The heat **resistance** makes the mat reliable in all conditions and ensures **safe** use, even when the kitchen is hot.

PROTECTS THE INDUCTION HOB

Easy to clean and maintain

One of the advantages of protective mats is their ease of cleaning. They can be **placed** on the induction hob and, if necessary, wiped with a damp cloth. If necessary, **the silicone mat** can also be cleaned in the dishwasher, making it easy to **keep clean**. These properties make the mats great for **everyday use**, even in kitchens that are heavily used.

EASY CLEANING

Simply wipe with a damp cloth or place in the dishwasher

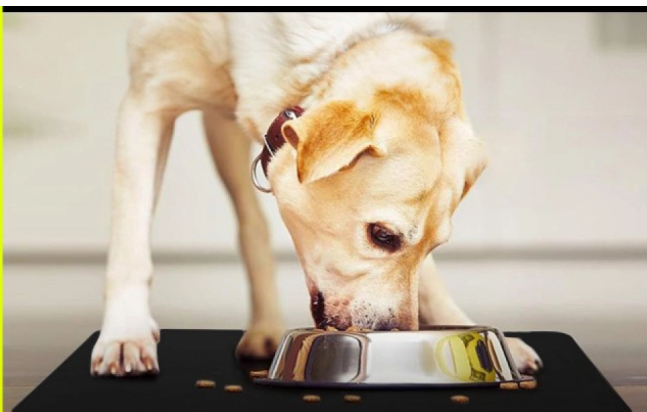

Universal application

The protective mat for induction hobs can be used not only in the kitchen. Its **versatility** allows it to be used in different parts of the house, such as the workshop, bathroom, and even as a **pad** for children or pets. **The protective mat** can protect surfaces from dirt, scratches and other damage, as well as help **keep** surfaces that are particularly vulnerable to damage in **order**.
