### Full product description

**A reliable device that will help you preserve the flavor and nutritional value of seasonal mushrooms, fruits and vegetables for longer.**

This mushroom, fruit and vegetable dryer allows you to **effectively dry a variety of** foods in the comfort of your own home. With this device, you can enjoy healthy snacks and homemade preserves all year round.

## Large capacity and modular design

Extralink Home offers a **large capacity** which allows you to dry a large number of mushrooms, fruits and vegetables at the same time. The 5 trays provide enough space for a variety of products, and their modular design allows for flexibility - you can add more levels depending on your needs. Thus, the dryer adapts to your requirements, no matter how much produce you want to dry.

## Precise temperature control

Drying fruits and vegetables requires the right temperature to preserve their flavor and nutritional value. Extralink Home is **equipped with an 8-stage temperature control** (from 35°C to 70°C), which allows you to adjust the drying conditions to different types of products. This way you can be sure that your preserves will have the perfect texture and taste.

## Safety of use

This dryer not only dries effectively, but also takes care of your safety. **Overheat protection** protects the appliance from damage, ensuring a long life. In addition, BPA Free means that **the dryer is free of harmful substances**, which is important for your and your family's health.

## Compact and convenient design

Despite its large capacity, the Extralink Home is compact and **easy to store**. Its dimensions make it fit easily into a kitchen cabinet. The light lavender color and modern design make the device blend in well with any interior.
