Watch case material	Acrylonitrile butadiene styrene (ABS)

Full product description

Extralink Jennifer 16 core black fiber optic box

Extralink Jennifer 16 core is equipment used at the point where the main fiber cable is separated into client cables (in PON technology). The housing can accommodate splices, splitters and other mounting accessories while maintaining protection and transparency of the network. Switchgear has midspan input for a trunk cable. It is also equipped with Huawei type connectors by default, which can be accessed from the bottom of the box, so there is no need to open the switch to connect a new client. It is enough to use patchcords equipped with compatible connectors (purchased separately).

Features:

- Tightly sealed structure in a nice shape
- Resistant to adverse weather conditions such as humidity, water and dust
- Features mounts for fiber optic cable and client cables, fiber splices, storage, distribution, etc. all in one
- Cables, pigtails, patchcords installed independently without affecting each other
- The box can be installed into a wall or pole, and is suitable for both indoor and outdoor mounting
- It has Huawei connectors installed underneath
