Full product description

Jikaida Chad Detector JKD-512COM

Jikaida JKD 512COM combi CO detector home fire alarm with siren **2 in 1** is designed to activate the siren when the limit concentration of carbon monoxide is exceeded or there is smoke in the room. It is basically **2 sensors in one**: home carbon monoxide detector fire alarm sensor (fire detector) siren for audible warning.

Long autonomous operation

This **wireless sensor** operates completely autonomously using **3 AA batteries**. Good batteries will last up to six months. The sensor has a low battery indicator and when it starts beeping every 30 seconds and displays a low battery icon on the display, the batteries need to be replaced.

Easy to install and use

The **Jikaida JKD-512COM** has no settings and there is a single "Test" button on the housing to self-test the sensor and check the current carbon monoxide and smoke values in the room. Simply insert the batteries and hang it from the ceiling of a room where carbon monoxide or fire is likely to occur, with **ceiling heights up to 12 metres**.

As a home carbon monoxide detector - it will activate an audible siren if the carbon monoxide concentration in the room exceeds **300 PPM**. As a fire smoke detector - will activate the siren if the smoke concentration in the room exceeds 0.1%db/m. You can also check the current smoke or carbon monoxide concentration at any time by pressing the "test" button.

Main functions and features

- 2 detectors in one housing: home carbon monoxide detector wireless smoke detector. Designed for local audible notification of a fire or exceeding the acceptable concentration of carbon monoxide in the room.
- Highly reliable electrochemical carbon monoxide sensor and infrared photoelectric sensor.
- Backlit LCD screen - displays the carbon monoxide level or smoke level in the room. Also indicates low battery.
- Powered by 3 AA batteries - enough for 6 months of stand-alone use.
- Low battery warning - allows you to change the battery in time for the sensor to operate continuously.
- Carbon monoxide/smoke memory function - remembers carbon monoxide readings when detected.
- Dual alarm notification: audible siren and flashing light.
