Manufacturer: EXTRALINK

Referention number: DNXGKINMHRMMKO

Information:

La tavola SUP Black Forest 305 × 81 × 15 cm è un modello stabile per il paddling ricreativo su laghi, fiumi e acque più calme. La struttura ampia facilita il mantenimento dell'equilibrio, mentre il materiale rigido drop-stitch 2700 GSM e i fianchi a doppio strato aumentano la durata e il comfort d'uso. La schiuma EVA antiscivolo da 3 mm migliora l'aderenza dei piedi, e il remo in alluminio a 3 pezzi incluso con regolazione 165-208 cm consente di adattare l'attrezzatura all'utente. La tavola può essere gonfiata fino a 15 PSI, e dopo l'uso si ripone facilmente nello zaino. Nel set è inclusa anche una pompa manuale.

Full product description

Black Forest SUP Board

The Black Forest SUP board with dimensions 305 × 81 × 15 cm is a model designed for recreational paddling on calmer waters. The 81 cm width helps maintain balance, and the 15 cm height supports the rigidity of the structure after inflation. It is ideal for relaxing by a lake, river, or on a holiday trip.

Comfort on the water

The 305 × 81 × 15 cm dimensions provide comfortable space for paddling while standing or kneeling. The wide surface helps maintain balance, making it easier to maneuver calmly and learn the basic movements on a SUP board.

Rigid construction

The board is made of 2700 GSM drop-stitch material. The internal structure with a height of 15 cm helps maintain its shape after inflation, thanks to which the board performs well during recreational use on the water.

Double-layer side

The side panel consists of two layers: an inner one 0.52 mm thick and an outer one 0.7 mm thick. This construction reinforces the edges of the board and increases the resistance of the side parts to typical loads during paddling and carrying.

3 mm EVA foam

On the upper part of the board there is 3 mm thick EVA foam. Its surface improves foot grip and increases comfort during longer time spent on the board, both while standing and kneeling.

Paddle and handling

The set includes a 3-piece paddle with an aluminum construction and TPR material grips, which help hold it more securely in your hands while paddling. The length adjustment from 165 to 208 cm makes it easy to adapt the paddle to the user. The board has a high-pressure valve, thanks to which it can be inflated to the recommended 15 PSI (1 bar), and after paddling the air can be quickly released.

Transport in a backpack

After deflating, the board can be packed into the included backpack. This makes it easier to transport the equipment by car, carry it to the water, and store it outside the season. The set also includes a hand pump.
