Manufacturer: WANBO

Referention number: DNXGKPIQFRMMMP

Information:

Wanbo X7 Pro Max è un proiettore multimediale domestico con risoluzione nativa Full HD 1080P, luminosità di 1500 ANSI lumen e immagine fino a 300 pollici, che garantisce una visione nitida e dettagliata anche con luce parziale. Il supporto HDR10, il contrasto 3500:1 e la tecnologia MEMC migliorano la qualità e la fluidità dell'immagine. Il Google TV integrato con Android 14 offre accesso alle app di streaming più popolari, mentre 2 GB di RAM e 32 GB di memoria ROM supportano un funzionamento fluido. La messa a fuoco automatica e la correzione trapezoidale semplificano la configurazione, mentre gli altoparlanti da 20 W con Dolby Audio e Wi-Fi, Bluetooth 5.0 e trasmissione wireless dell'immagine assicurano comodità e un centro di intrattenimento completo in un unico dispositivo.

Full product description

Wanbo X7 Pro Max - home cinema with Full HD image and intelligent Google TV system

Wanbo X7 Pro Max is a multimedia projector designed for people who want to create their own entertainment space at home. The device combines high image quality, smart system features, and solutions that make everyday use easier. Thanks to its native **Full HD 1080P** resolution, **1500 ANSI lumens** brightness, and the ability to display an image up to **300 inches**, the projector lets you watch movies, series, sports broadcasts, and other multimedia content on a large screen. The device's design has been prepared to work well both for everyday use in the living room and for special movie sessions.

Full HD 1080P image and 1500 ANSI lumens brightness for a clear projection

The **Wanbo X7 Pro Max** projector uses a native resolution of **1920 × 1080 pixels (Full HD)**, thanks to which the displayed image retains proper detail and sharpness. The **ANSI lumens** parameter defines the projector's actual brightness according to a specific measurement standard. The value of **1500 ANSI lumens** helps achieve a readable image and maintain detail visibility even when the room is not completely darkened. In practice, this means greater flexibility when choosing a projection location – the projector can be used not only in the evening, but also during the day with limited ambient light.

HDR10 and 3500:1 contrast - more detail in bright and dark scenes

Wanbo X7 Pro Max supports **HDR10** technology, which increases the range of displayed brightness levels. As a result, the projector can better reproduce differences between very bright and dark parts of the image. When watching movies, this translates into more detailed night scenes, better visible elements in shadows, and more natural reproduction of bright areas. In addition, the **3500:1** contrast ratio helps maintain clear tonal transitions and improves the viewing experience of films and photos.

MEMC technology - smoother image during dynamic scenes

The projector is equipped with **MEMC (Motion Estimation, Motion Compensation)** technology, a solution designed to improve motion smoothness by analyzing changes between consecutive frames. This function helps reduce blur during fast shots and makes dynamic content more comfortable to watch. It is especially useful when watching **sports events**, action movies, and playing games, where fast-moving objects require efficient motion reproduction.

Google TV and Android 14 - a home entertainment center in one device

Wanbo X7 Pro Max has a built-in **Google TV** system, which allows you to use apps and streaming services without connecting an additional device. The user can access platforms such as **Netflix**, **YouTube**, and **Disney+**, as well as install more apps available in the **Google Play** store. The **Android 14** system provides intuitive interface operation and convenient access to projector settings and functions. Thanks to this, the device can serve as a complete multimedia center at home.

INSTALLAZIONE SENZA LIMITI

Soffitto, parete o treppiede

Il proiettore può essere montato a soffitto, a parete o posizionato su un tavolo o un treppiede. Un unico dispositivo: tre modi per organizzare lo spazio.

Installazione a parete

Risparmia spazio e ha un aspetto elegante

Installazione a soffitto

Stabile e discreto: ideale per il cinema in casa

Installazione su treppiede

Facile da spostare e comoda regolazione dell'angolo

Efficient components and convenient app handling

Smooth operation of multimedia functions is ensured by the projector's appropriate hardware configuration. **Wanbo X7 Pro Max** is equipped with **2 GB of RAM** and **32 GB of internal ROM memory**, which enables efficient system operation, app installation, and storage of user settings. The internal memory allows use of the advanced features of the **Google TV** system, while the appropriate amount of RAM supports comfortable menu navigation and access to available functions. With this configuration, the projector can operate as a standalone entertainment device without the need for additional multimedia accessories.

MT9660

Chip potente

Il processore MT9660 migliora la qualità di immagine e suono, mentre 2 GB di RAM e 32 GB di memoria garantiscono un funzionamento fluido e rapido del sistema.

Automatic focus and keystone correction - quick image setup

The **Wanbo X7 Pro Max** projector is equipped with features that make everyday setup easier. **Automatic focus adjustment** allows you to quickly obtain a sharp image without manual lens adjustment. Meanwhile, **automatic keystone correction** helps adjust the shape of the displayed image when the projector is not positioned perfectly in front of the projection surface. Thanks to these solutions, the user can more easily prepare the device for use in different places, both during permanent installation and occasional use.

La risoluzione nativa 1080p, il contrasto 3500:1 e HDR10 garantiscono una chiarezza realistica e dettagli ricchi sia nelle zone chiare che in quelle scure dell'immagine.

Standard

Dolby Audio and 20 W speakers - fuller viewing experience

Wanbo X7 Pro Max has a built-in audio system consisting of two speakers with **10 W each**. Support for **Dolby Audio** is responsible for processing sound in a way that delivers a more spacious and clearer audio experience. In practice, this means more audible dialogue, more detailed sound effects, and a more enjoyable music experience while using the projector. Thanks to the integrated audio system, the device can serve as a complete entertainment center without the immediate need to connect external speakers.

Wi-Fi, Bluetooth, and wireless image transmission

The projector offers broad communication capabilities thanks to support for **Wi-Fi 2.4 GHz and 5 GHz**. Dual-band wireless connectivity allows convenient use of internet services and apps available in the system. The **Bluetooth 5.0** module lets you connect compatible devices such as wireless speakers or other accessories. The wireless image transmission function enables content to be displayed from a smartphone, so the user can quickly show photos, videos, presentations, or sports broadcasts on a large screen.

Oro ossidiana

Design di classe premium

Rievocando il design classico della serie X5 Pro, il proiettore si distingue per la sua lussuosa finitura in tinta oro ossidiana e una copertura decorativa realizzata con precisione.
