Full product description

Fonte de alimentação PoE Extralink 24 V 12 W

O adaptador de energia Extralink PoE fornece eletricidade através de fios selecionados do cabo de par trançado para dispositivos de rede como conversores de mídia, pontos de acesso, câmeras, etc.

24V 12W PoE power supply

2 Ethernet LAN ports
(RJ-45)

PoE suport

LED indicator

Power cable
included

Compact size

A PSU está equipada com um cabo de alimentação de 1,2 metros de comprimento, terminado com um conector cloverleaf e duas portas RJ45. Uma delas liga o dispositivo a ser alimentado e a outra com um patchcord para ligar um switch ou um router. O dispositivo pode ser instalado em salas de estar, salas teletécnicas ou armários de rack.

EXTRALINK

12W PoE power supply

The Extralink PoE power supply (power adapter) supplies electrical energy via selected strands of the twisted-pair cable to network devices such as media converters, access points, cameras, etc.

Um LED indica o funcionamento correcto do dispositivo. Em caso de proteção contra curto-circuito ou sobrecarga, a fonte de alimentação PoE corta a tensão para o dispositivo e restabelece a tensão automaticamente após a falha ter cessado.

PoE power supplies are widely used in various areas where there is a need to power network devices without the need for separate power supplies.

VoIP telephones

These can be easily installed in offices or other locations without the need for a separate power supply.

Network equipment

Other network devices such as switches, routers and similar devices can also be powered by PoE.

Wireless access points

Facilitates the installation and deployment of devices to ensure better wireless coverage.

External installations

In the case of outdoor installations, such as outdoor surveillance and signalling systems, PoE power supplies allow for easy installation without the need for complex power supply solutions.

IP cameras

Allows cameras to be easily installed in a variety of locations, even where power sockets are not available

Intelligent lighting and building management systems

Some lighting and building management systems can be powered by PoE, which simplifies energy management and enables easy installation.

A wide range of PoE power supply applications

PoE power supplies are versatile and used in a variety of environments, whether in commercial buildings, offices or industrial applications. They allow network devices to be powered without the need for separate power cables, simplifying the installation and management of the network infrastructure.
