Full product description

Fonte de alimentação PoE Extralink 48 V 48 W

A fonte de alimentação fornece energia através de fios selecionados de um cabo de par trançado para dispositivos de rede, como APs, câmeras, etc. Esta solução possibilita a transmissão de dados de rede enquanto fornece energia através de um único cabo.

Gigabit 48W 802.3af PoE power supply

Gigabit Ports

802.3af

Plug and Play

LED indicators

Overload protection

Compact size

A PSU está equipada com um cabo de alimentação de 1,2 metros de comprimento, terminado com um conector cloverleaf e duas portas RJ45. Uma delas liga o dispositivo que vai ser alimentado e a segunda é para ligar um switch ou um router com um patchcord.

EXTRA LINK

48W PoE power supply

A PoE (Power over Ethernet) power supply unit is a device used to supply power to network devices such as IP cameras, VoIP telephones or wireless access points via the Ethernet cable.

Um LED indica o funcionamento correcto do dispositivo. Em caso de proteção contra curto-circuito ou sobrecarga, a fonte de alimentação PoE corta a tensão para o dispositivo e restabelece a tensão automaticamente após a falha ter cessado.

PoE power supplies are widely used in various areas where there is a need to power network devices without the need for separate power supplies.

VoIP telephones

These can be easily installed in offices or other locations without the need for a separate power supply.

Network equipment

Other network devices such as switches, routers and similar devices can also be powered by PoE.

Wireless access points

Facilitates the installation and deployment of devices to ensure better wireless coverage.

External installations

In the case of outdoor installations, such as outdoor surveillance and signalling systems, PoE power supplies allow for easy installation without the need for complex power supply solutions.

IP cameras

Allows cameras to be easily installed in a variety of locations, even where power sockets are not available

Intelligent lighting and building management systems

Some lighting and building management systems can be powered by PoE, which simplifies energy management and enables easy installation.

Widely used PoE power supply

PoE power supplies are versatile and are used in a wide range of environments, from commercial buildings and offices to industrial applications. They allow network devices to be powered without the need for separate power cables, simplifying installation and management of the network infrastructure.
