Full product description

Источник питания PoE Extralink 24 В 12 Вт

Адаптер питания (сетевой адаптер) Extralink PoE подает электроэнергию по отдельным проводам витой пары на сетевые устройства, такие как медиаконвертеры, камеры Access point и т.д.

24V 12W PoE power supply

2 Ethernet LAN ports
(RJ-45)

PoE suport

LED indicator

Power cable
included

Compact size

Блок питания оснащен кабелем питания длиной 1,2 метра с разъемом типа "клеверный лист" и двумя портами RJ45, один из которых используется для подключения питаемого устройства, а второй - для подключения коммутатора или маршрутизатора с патчкордом. Устройство может быть установлено в жилых помещениях, телетехнических комнатах или стоечных шкафах.

EXTRALINK

12W PoE power supply

The Extralink PoE power supply (power adapter) supplies electrical energy via selected strands of the twisted-pair cable to network devices such as media converters, access points, cameras, etc.

Светодиод указывает на правильную работу устройства. В случае короткого замыкания или срабатывания защиты от перегрузки источник питания PoE отключает напряжение на устройстве и автоматически восстанавливает напряжение после прекращения сбоя.

PoE power supplies are widely used in various areas where there is a need to power network devices without the need for separate power supplies.

VoIP telephones

These can be easily installed in offices or other locations without the need for a separate power supply.

Network equipment

Other network devices such as switches, routers and similar devices can also be powered by PoE.

Wireless access points

Facilitates the installation and deployment of devices to ensure better wireless coverage.

External installations

In the case of outdoor installations, such as outdoor surveillance and signalling systems, PoE power supplies allow for easy installation without the need for complex power supply solutions.

IP cameras

Allows cameras to be easily installed in a variety of locations, even where power sockets are not available

Intelligent lighting and building management systems

Some lighting and building management systems can be powered by PoE, which simplifies energy management and enables easy installation.

A wide range of PoE power supply applications

PoE power supplies are versatile and used in a variety of environments, whether in commercial buildings, offices or industrial applications. They allow network devices to be powered without the need for separate power cables, simplifying the installation and management of the network infrastructure.
