Full product description

Источник питания PoE Extralink 24 В

Источник питания подает питание через отдельные провода витой пары на сетевые устройства, такие как точки доступа, камеры и т.д. Это решение позволяет передавать сетевые данные при одновременной подаче питания.

PoE power supply Plug for electrical outlet 24V 12W 0.5A

LED indicator

2 Ethernet LAN ports
(Rj-45)

PoE suport

Compact size

Блок питания оснащен двумя портами RJ45, один из которых используется для подключения питаемого устройства, а другой - для подключения коммутатора патчкордов или маршрутизатора.

EXTRA LINK

PoE 24V 0.5A power supply

This power supply provides electrical power via selected strands of the twisted-pair cable to network devices such as APs, cameras, etc., allowing network data to be transmitted while providing power. This enables network data to be transmitted while also providing power.

PoE power supplies are widely used in various areas where there is a need to power network devices without the need for separate power supplies.

VoIP telephones

These can be easily installed in offices or other locations without the need for a separate power supply.

Network equipment

Other network devices such as switches, routers and similar devices can also be powered by PoE.

Wireless access points

Facilitates the installation and deployment of devices to ensure better wireless coverage.

External installations

In the case of outdoor installations, such as outdoor surveillance and signalling systems, PoE power supplies allow for easy installation without the need for complex power supply solutions.

IP cameras

Allows cameras to be easily installed in a variety of locations, even where power sockets are not available

Intelligent lighting and building management systems

Some lighting and building management systems can be powered by PoE, which simplifies energy management and enables easy installation.
